Return on Assets	1.12%	0.63%	—
Return on Equity	13.39%	7.23%	—

DEPOSIT AND LOAN GROWTH

Note: All balances above reflect continuing operations

* Excludes loans held for sale.
^A From continuing operations.

Dear Shareholder:

We are pleased to report another year of industry-leading growth and record profitability for Texas Capital. Especially noteworthy are improvements in operating leverage, credit quality and market share gains in key lines of business. Our core earnings power has never been better. We believe our performance has been exceptional in light of what remains a challenging environment for the banking industry.

Our operating leverage improved with the achievement of a more favorable earning asset composition and a reduction in excess liquidity. We improved our funding profile which resulted in an excellent cost of funds.

Our credit costs and non-performing assets decreased substantially in 2011, and we expect additional reductions in 2012. Credit quality continues to be a strong attribute of your company and is evidence of the strength of our model.

Texas Capital was only one of the few banks in the country to grow loans during the 2007-2011 economic cycle, and we grew them across multiple lines of business and in all of our markets. We have experienced significant success in lines of business that benefit from counter-cyclical trends, offer opportunity for additional growth in market share and provide for more consistent earnings contributions. Our growth is a product of our focus on hiring the best bankers in the state and having them bring their best customers to our bank. We are taking market share and doing so organically without any bank acquisitions because we believe that brings the greatest value to our shareholders.

In closing, I would like to emphasize the following points:

- Our strong core earnings power will continue in 2012.
- We will maintain a capital position needed to grow the business. We are now growing capital internally at approximately the same rate of growth of our loans held for investment.
- Credit will remain a focus and is expected to continue to improve.
- We have a strong pipeline in place and expect that to be reflected in continuing growth in our loans held for investment and loans held for sale.

Lastly, I would like to thank our valued shareholders, customers and employees for their support and loyalty over the last year. We are working hard on their behalf to justify and retain the title of “The Best Business Bank in Texas.”

Sincerely yours,

George F. Jones, Jr.
President and Chief Executive Officer

ITEM 1. BUSINESS

Background

Texas Capital Bancshares, Inc., a financial holding company, is the parent of Texas Capital Bank, National Association, a Texas-based bank headquartered in Dallas, with our primary banking offices in Dallas, Houston, Fort Worth, Austin and San Antonio, the state's five largest metropolitan areas. All of our business activities are conducted through our bank subsidiary. Our market focus is commercial businesses and successful professionals and entrepreneurs, and we offer a variety of banking products and services to our customers. We have focused on organic growth, maintenance of credit quality and bankers with strong personal and professional relationships in their communities.

We focus on serving the needs of commercial businesses and successful professionals and entrepreneurs, the core of our model since our organization in March 1998. We do not incur the costs of competing in an over-branched and over-crowded consumer market. We are primarily a secured lender in Texas, and, as a result, we have experienced a low percentage of charge-offs relative to both total loans and non-performing loans since inception. Our loan portfolio is diversified by industry, collateral and geography in Texas.

Growth History

We have grown substantially in both size and profitability since our formation. The table below sets forth data regarding the growth of key areas of our business from December 2007 through December 2011 (in thousands):

	2011	2010	December 31 2009	2008	2007
Loans held for investment	\$5,572,371	\$4,711,330	\$4,457,293	\$4,027,871	\$3,462,608
Total loans ⁽¹⁾	7,652,452	5,905,539	5,150,797	4,524,222	3,636,774
Assets ⁽¹⁾	8,137,225	6,445,679	5,698,318	5,141,034	4,287,853
Demand deposits	1,751,944	1,451,307	899,492	587,161	529,334
Total deposits	5,556,257	5,455,401	4,120,725	3,333,187	3,066,377
Stockholders' equity	616,331	528,319	481,360	387,073	295,138

(1) From continuing operations.

The following table provides information about the growth of our loan portfolio by type of loan from December 2007 to December 2011 (in thousands):

	2011	2010	December 31 2009	2008	2007
Commercial loans	\$3,275,150	\$2,592,924	\$2,457,533	\$2,276,054	\$2,035,049
Total real estate loans	2,241,277	2,029,766	1,903,127	1,656,221	1,347,429
Construction loans	422,026	270,008	669,426	667,437	573,459
Real estate term loans	1,819,251	1,759,758	1,233,701	988,784	773,970
Loans held for sale	2,080,081	1,194,209	693,504	496,351	174,166
Loans held for sale from discontinued operations	393	490	586	648	731
Equipment leases	61,792	95,607	99,129	86,937	74,523
Consumer loans	24,822	21,470	25,065	32,671	28,334

The Texas Market

The Texas market for banking services is highly competitive. Texas' largest banking organizations are headquartered outside of Texas and are controlled by out-of-state organizations. We also compete with other providers of financial services, such as savings and loan associations, credit unions, consumer finance companies, securities firms, insurance companies, commercial finance and leasing companies, full service brokerage firms and discount brokerage firms. We believe that many middle market companies and successful professionals and entrepreneurs are interested in banking with a company headquartered in, and with decision-making authority based in, Texas and with established Texas bankers who have the expertise to act as trusted advisors to the customer with regard to its banking needs. Our banking centers in our target markets are served by experienced bankers with lending expertise in the specific industries found in their market areas and established community ties. We believe our bank can offer customers more responsive and personalized service. We believe that, if we service these customers properly, we will be able to establish long-term relationships and provide multiple products to our customers, thereby enhancing our profitability.

Business Strategy

Utilizing the business and community ties of our management and their banking experience, our strategy is building an independent bank that focuses primarily on middle market business customers and successful professionals and entrepreneurs in each of the five major metropolitan markets of Texas. To achieve this, we seek to implement the following strategies:

- target middle market businesses and successful professionals and entrepreneurs;
- grow our loan and deposit base in our existing markets by hiring additional experienced Texas bankers;
- continue the emphasis on credit policy to provide for credit quality consistent with long-term objectives;
- improve our financial performance through the efficient management of our infrastructure and capital base, which includes:
 - leveraging our existing infrastructure to support a larger volume of business;
 - maintaining stringent internal approval processes for capital and operating expenses;
 - extensive use of outsourcing to provide cost-effective operational support with service levels consistent with large-bank operations; and
- extend our reach within our target markets of Austin, Dallas, Fort Worth, Houston and San Antonio through service innovation and service excellence.

Products and Services

We offer a variety of loan, deposit account and other financial products and services to our customers.

Business Customers. We offer a full range of products and services oriented to the needs of our business customers, including:

- commercial loans for general corporate purposes including financing for working capital, internal growth, acquisitions and financing for business insurance premiums;
- real estate term and construction loans;
- equipment leasing;
- treasury management services;
- trust and wealth management services; and
- letters of credit.

Individual Customers. We also provide complete banking services for our individual customers, including:

- personal trust and wealth management services;
- certificates of deposit;
- interest bearing and non-interest bearing checking accounts with optional features such as Visa® debit/ATM cards and overdraft protection;
- traditional money market and savings accounts;
- loans, both secured and unsecured; and
- internet banking.

Lending Activities

We target our lending to middle market businesses and successful professionals and entrepreneurs that meet our credit standards. The credit standards are set by our standing Credit Policy Committee with the assistance of our Bank's Chief Credit and Risk Officer, who is charged with ensuring that credit standards are met by loans in our portfolio. Our Credit Policy Committee is comprised of senior Bank officers including our Bank's Chief Executive Officer, our Bank's President/Chief Lending Officer and our Bank's Chief Credit and Risk Officer. We believe we have maintained a diversified loan portfolio. Credit policies and underwriting guidelines are tailored to address the unique risks associated with each industry represented in the portfolio. Our credit standards for commercial borrowers reference numerous criteria with respect to the borrower, including historical and projected financial information, strength of management, acceptable collateral and associated advance rates, and market conditions and trends in the borrower's industry. In addition, prospective loans are also analyzed based on current industry concentrations in our loan portfolio to prevent an unacceptable concentration of loans in any particular industry. We believe our credit standards are consistent with achieving business objectives in the markets we serve and will generally mitigate risks. We believe that we differentiate our bank from its competitors by focusing on and aggressively marketing to our core customers and accommodating, to the extent permitted by our credit standards, their individual needs.

We generally extend variable rate loans in which the interest rate fluctuates with a predetermined indicator such as the United States prime rate or the London Interbank Offered Rate (LIBOR). Our use of variable rate loans is designed to protect us from risks associated with interest rate fluctuations since the rates of interest earned will automatically reflect such fluctuations.

Deposit Products

We offer a variety of deposit products to our core customers at interest rates that are competitive with other banks. Our business deposit products include commercial checking accounts, lockbox accounts, cash concentration accounts, and other treasury management services, including an on-line system. Our treasury management on-line system offers information services, wire transfer initiation, ACH initiation, account transfer, and service integration. Our consumer deposit products include checking accounts, savings accounts, money market accounts and certificates of deposit. We also allow our consumer deposit customers to access their accounts, transfer funds, pay bills and perform other account functions over the Internet and through ATM machines.

Trust and Wealth Management

Our trust and wealth management services include investment management, personal trust and estate services, custodial services, retirement accounts and related services. Our investment management professionals work with our clients to define objectives, goals and strategies for their investment portfolios. We assist the customer with the selection of an investment manager and work with the client to tailor the investment program accordingly. We also offer retirement products such as individual retirement accounts and administrative services for retirement vehicles such as pension and profit sharing plans.

Cayman Islands Branch

In June 2003, we received authorization from the Cayman Islands Monetary Authority to establish a branch of our bank in the Cayman Islands. We believe that a Cayman Islands branch of our bank enables us to offer more competitive cash management and deposit products to our core customers. Our Cayman Islands branch consists of an agent office to facilitate our offering of these products. We opened our Cayman Islands branch in September 2003. All deposits in the Cayman Branch come from U.S. based customers of our Bank. Deposits do not originate from foreign sources, and funds transfers neither come from nor go to facilities outside of the U.S. All deposits are in U.S. dollars. As of December 31, 2011, our Cayman Islands deposits totaled \$480.3 million.

Employees

As of December 31, 2011, we had 786 full-time employees relating to our continuing operations. None of our employees is represented by a collective bargaining agreement and we consider our relations with our employees to be good.

Regulation and Supervision

Current banking laws contain numerous provisions affecting various aspects of our business. Our bank is subject to federal banking laws and regulations that impose specific requirements on and provide regulatory oversight of virtually all aspects of our operations. These laws and regulations are generally intended for the protection of depositors, the deposit insurance funds of the Federal Deposit Insurance Corporation, or the FDIC, and the banking system as a whole, rather than for the protection of our stockholders. Banking regulators have broad enforcement powers over financial holding companies and banks and their affiliates, including the power to establish regulatory requirements, impose large fines and other penalties for violations of laws and regulations. The following is a brief summary of laws and regulations to which we are subject.

National banks such as our bank are subject to examination by the Office of the Comptroller of the Currency, or the OCC. The OCC and the FDIC regulate or monitor all areas of a national bank's operations, including security devices and procedures, adequacy of capitalization and loss reserves, loans, investments, borrowings, deposits, mergers, issuances of securities, payment of dividends, interest rate risk management, establishment of branches, corporate reorganizations, maintenance of books and records, and adequacy of staff training to carry on safe lending and deposit gathering practices. The OCC requires national banks to maintain capital ratios and imposes limitations on its aggregate investment in real estate, bank premises and furniture and fixtures. National banks are currently required by the OCC to prepare quarterly reports on their financial condition and to conduct an annual audit of their financial affairs in compliance with minimum standards and procedures prescribed by the OCC.

Restrictions on Dividends and Repurchases. Our source of funding to pay dividends is our bank. Our bank is subject to statutory dividend restrictions. Under such restrictions, national banks may not, without the prior approval of the OCC, declare dividends in excess of the sum of the current year's net profits plus the retained net profits from the prior two years, less any required transfers to surplus. In addition, under the Federal Deposit Insurance Corporation Improvement Act of 1991, our bank may not pay any dividend if payment would cause it to become undercapitalized or in the event it is undercapitalized.

It is the policy of the Federal Reserve, which regulates financial holding companies such as ours, that financial holding companies should pay cash dividends on common stock only out of income available over the past year and only if prospective earnings retention is consistent with the organization's expected future needs and financial condition. The policy provides that financial holding companies should not maintain a level of cash dividends that undermines the financial holding company's ability to serve as a source of strength to its banking subsidiaries.

If, in the opinion of the applicable federal bank regulatory authority, a depository institution or holding company is engaged in or is about to engage in an unsound practice (which could include the payment of

dividends), such authority may require, generally after notice and hearing, that such institution or holding company cease and desist such practice. The federal banking agencies have indicated that paying dividends that deplete a depository institution's or holding company's capital base to an inadequate level would be such an unsafe banking practice. Moreover, the Federal Reserve and the FDIC have issued policy statements providing that financial holding companies and insured depository institutions generally should only pay dividends out of current operating earnings.

Supervision by the Federal Reserve. We operate as a financial holding company registered under the Bank Holding Company Act, and, as such, we are subject to supervision, regulation and examination by the Federal Reserve. The Bank Holding Company Act and other Federal laws subject financial holding companies to particular restrictions on the types of activities in which they may engage, and to a range of supervisory requirements and activities, including regulatory enforcement actions for violations of laws and regulations.

Because we are a legal entity separate and distinct from our bank, our right to participate in the distribution of assets of any subsidiary upon the subsidiary's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors. In the event of a liquidation or other resolution of a subsidiary, the claims of depositors and other general or subordinated creditors are entitled to a priority of payment over the claims of holders of any obligation of the institution to its stockholders, including any financial holding company (such as ours) or any stockholder or creditor thereof.

Support of Subsidiary Banks. Under Federal Reserve policy, a financial holding company is expected to act as a source of financial and managerial strength to each of its banking subsidiaries and commit resources to their support. Such support may be required at times when, absent this Federal Reserve policy, a holding company may not be inclined to provide it. As discussed below, a financial holding company in certain circumstances could be required to guarantee the capital plan of an undercapitalized banking subsidiary in order for it to be accepted by the regulators.

In the event of a financial holding company's bankruptcy under Chapter 11 of the U.S. Bankruptcy Code, the bankruptcy trustee will be deemed to have assumed and is required to cure immediately any deficit under any commitment by the debtor holding company to any of the federal banking agencies to maintain the capital of an insured depository institution, and any claim for breach of such obligation will generally have priority over most other unsecured claims.

Capital Adequacy Requirements. The bank regulators have adopted a system using risk-based capital guidelines to evaluate the capital adequacy of banking organizations. Under the guidelines, specific categories of assets and off-balance sheet activities such as letters of credit are assigned different risk weights, based generally on the perceived credit risk of the asset. These risk weights are multiplied by corresponding asset balances to determine a "risk weighted" asset base. The guidelines require a minimum total risk-based capital ratio of 8% (of which at least 4% is required to consist of Tier 1 capital elements).

In addition to the risk-based capital guidelines, the OCC and the Federal Reserve use a leverage ratio as an additional tool to evaluate the capital adequacy of banking organizations. The leverage ratio is a company's Tier 1 capital divided by its average total consolidated assets. Banking organizations must maintain a minimum leverage ratio of at least 3%, although most organizations are expected to maintain leverage ratios that are at least 100 to 200 basis points above this minimum ratio.

The federal banking agencies' risk-based and leverage ratios are minimum supervisory ratios generally applicable to banking organizations that meet specified criteria, assuming that they have the highest regulatory rating. Banking organizations not meeting these criteria are expected to operate with capital positions well above the minimum ratios. The federal bank regulatory agencies may set capital requirements for a particular banking organization that are higher than the minimum ratios when circumstances warrant. Federal Reserve and OCC guidelines also provide that banking organizations experiencing significant internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels, without significant reliance on intangible assets. In addition, the regulations of the bank regulators provide that concentration of credit risks arising from non-traditional activities, as well as an institution's ability to manage these risks, are important factors to be taken into account by regulatory agencies in assessing an organization's overall capital adequacy.

Transactions with Affiliates and Insiders. Our bank is subject to Section 23A of the Federal Reserve Act which places limits on, among other covered transactions, the amount of loans or extensions of credit to affiliates that it may make. In addition, extensions of credit must be collateralized by Treasury securities or other collateral in prescribed amounts. It also limits the amount of advances to third parties which are collateralized by our securities or obligations or the securities or obligations of any of our non-banking subsidiaries.

Our bank also is subject to Section 23B of the Federal Reserve Act, which, among other things, prohibits an institution from engaging in transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to such institution or its subsidiaries, as those prevailing at the time for comparable transactions with non-affiliates.

We are subject to restrictions on extensions of credit to executive officers, directors, principal stockholders and their related interests. These restrictions contained in the Federal Reserve Act and Federal Reserve Regulation O apply to all insured institutions and their subsidiaries and holding companies. These restrictions include limits on loans to one borrower and conditions that must be met before such a loan can be made. There is also an aggregate limitation on all loans to insiders and their related interests. These loans cannot exceed the institution's total unimpaired capital and surplus, and the FDIC may determine that a lesser amount is appropriate. Insiders are subject to enforcement actions for knowingly accepting loans in violation of applicable restrictions. See additional restrictions on transactions with affiliates and insiders discussed in the Dodd-Frank Act section.

Corrective Measures for Capital Deficiencies. The Federal Deposit Insurance Corporation Improvement Act imposes a regulatory matrix which requires the federal banking agencies, which include the FDIC, the OCC and the Federal Reserve, to take "prompt corrective action" with respect to capital deficient institutions. The prompt corrective action provisions subject undercapitalized institutions to an increasingly stringent array of restrictions, requirements and prohibitions as their capital levels deteriorate. Should these corrective measures prove unsuccessful in recapitalizing the institution and correcting its problems, the Federal Deposit Insurance Corporation Improvement Act mandates that the institution be placed in receivership.

Pursuant to regulations promulgated under the Federal Deposit Insurance Corporation Improvement Act, the corrective actions that the banking agencies either must or may take are tied primarily to an institution's capital levels. In accordance with the framework adopted by the Federal Deposit Insurance Corporation Improvement Act, the banking agencies have developed a classification system, pursuant to which all banks and thrifts are placed into one of five categories. Agency regulations define, for each capital category, the levels at which institutions are "well capitalized", "adequately capitalized", "undercapitalized", "significantly undercapitalized" and "critically undercapitalized." A well capitalized bank has a total risk-based capital ratio (total capital to risk-weighted assets) of 10% or higher; a Tier 1 risk-based capital ratio (Tier 1 capital to risk-weighted assets) of 6% or higher; a leverage ratio (Tier 1 capital to total adjusted assets) of 5% or higher; and is not subject to any written agreement, order or directive requiring it to maintain a specific capital level for any capital measure. An institution is critically undercapitalized if it has a tangible equity to total assets ratio that is equal to or less than 2%. Our bank's total risk-based capital ratio was 10.12% at December 31, 2011 and, as a result, it is currently classified as "well capitalized" for purposes of the OCC's prompt corrective action regulations. The bank's capital category of "well capitalized" is determined solely for the purposes of applying prompt corrective action and that the capital category may not constitute an accurate representation of the bank's overall financial condition or prospects. The OCC, Federal Reserve and FDIC may, pursuant to changes in their regulatory or statutory responsibilities, determine that additional capital may be required.

In addition to requiring undercapitalized institutions to submit a capital restoration plan which must be guaranteed by its holding company (up to specified limits) in order to be accepted by the bank regulators, agency regulations contain broad restrictions on activities of undercapitalized institutions including asset growth, acquisitions, branch establishment and expansion into new lines of business. With some exceptions, an insured depository institution is prohibited from making capital distributions, including dividends, and is prohibited from paying management fees to control persons if the institution would be undercapitalized after any such distribution or payment.

As an institution's capital decreases, the OCC's enforcement powers become more severe. A significantly undercapitalized institution is subject to mandated capital raising activities, restrictions on interest rates paid and transactions with affiliates, removal of management and other restrictions. The OCC has only very limited discretion in dealing with a critically undercapitalized institution and is virtually required to appoint a receiver or conservator (the FDIC) if the capital deficiency is not corrected promptly.

Banks with risk-based capital and leverage ratios below the required minimums may also be subject to certain administrative actions, including the termination of deposit insurance upon notice and hearing, or a temporary suspension of insurance without a hearing in the event the institution has no tangible capital.

BASEL III. On December 15, 2010, the Basel Committee released its final framework for strengthening international capital and liquidity regulation, known as Basel III. When fully phased in on January 1, 2019, Basel III requires banks to maintain the following new standards and introduces a new capital measure "Common Equity Tier 1", or "CET1". Basel III increases the CET1 to risk-weighted assets to 4.5%, and introduces a capital conservation buffer of an additional 2.5% of common equity to risk-weighted assets, raising the target CET1 to risk-weighted assets ratio to 7%. It requires banks to maintain a minimum ratio of Tier 1 capital to risk weighted assets of at least 6.0%, plus the capital conservation buffer effectively resulting in Tier 1 capital ratio of 8.5%. Basel III increases the minimum total capital ratio to 8.0% plus the capital conservation buffer, increasing the minimum total capital ratio to 10.5%. Basel III also introduces a non-risk adjusted tier 1 leverage ratio of 3%, based on a measure of total exposure rather than total assets, and new liquidity standards. The Basel III capital and liquidity standards will be phased in over a multi-year period, but the implementation of the new framework will commence January 1, 2013. On that date, banks will be required to meet the following minimum capital ratios: 3.5% CET1 to risk-weighted assets, 4.5% Tier 1 capital to risk-weighted assets and 8.0% total capital to risk-weighted assets. Although the Basel III framework is not directly binding on the U.S. bank regulatory agencies, the regulatory agencies will likely implement changes to the capital adequacy standards applicable to the insured depository institutions and their holding companies in light of Basel III.

Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley") contains important requirements for public companies in the area of financial disclosure and corporate governance. In accordance with Section 302(a) of Sarbanes-Oxley, written certifications by our chief executive officer and chief financial officer are required. These certifications attest that our quarterly and annual reports do not contain any untrue statement of a material fact.

Financial Modernization Act of 1999. The Gramm-Leach-Bliley Financial Modernization Act of 1999 ("the Modernization Act"):

- allows bank holding companies meeting management, capital and Community Reinvestment Act standards to engage in a substantially broader range of non-banking activities than was permissible prior to enactment, including insurance underwriting and making merchant banking investments in commercial and financial companies;
- allows insurers and other financial services companies to acquire banks; and
- removes various restrictions that applied to bank holding company ownership of securities firms and mutual fund advisory companies; and establishes the overall regulatory structure applicable to bank holding companies that also engage in insurance and securities operations.

The Modernization Act also modifies other current financial laws, including laws related to financial privacy. The financial privacy provisions generally prohibit financial institutions, including us, from disclosing non-public personal financial information to non-affiliated third parties unless customers have the opportunity to "opt out" of the disclosure.

Community Reinvestment Act. The Community Reinvestment Act of 1977 ("CRA") requires depository institutions to assist in meeting the credit needs of their market areas consistent with safe and sound banking practice. Under the CRA, each depository institution is required to help meet the credit needs of its market areas by, among other things, providing credit to low- and moderate-income individuals and

communities. Depository institutions are periodically examined for compliance with the CRA and are assigned ratings. In order for a financial holding company to commence new activity permitted by the Bank Holding Company Act, each insured depository institution subsidiary of the financial holding company must have received a rating of at least “satisfactory” in its most recent examination under the CRA.

The USA Patriot Act, the International Money Laundering Abatement and Financial Anti-Terrorism Act and the Bank Secrecy Act. A major focus of governmental policy on financial institutions in recent years has been aimed at combating money laundering and terrorist financing. The USA Patriot Act of 2001 and the International Money Laundering Abatement and Financial Anti-Terrorism Act of 2001 substantially broadened the scope of United States anti-money laundering laws and penalties, specifically related to the Bank Secrecy Act, and expanded the extra-territorial jurisdiction of the United States. The United States Treasury Department has issued a number of implementing regulations which apply various requirements of the USA Patriot Act to financial institutions such as our bank. These regulations impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing and to verify the identity of their customers. Failure of a financial institution to maintain and implement adequate programs to combat money laundering and terrorist financing, or to comply with relevant laws or regulations, could have serious legal, reputational and financial consequences for the institution. Because of the significance of regulatory emphasis on these requirements, we will continue to expend significant staffing, technology and financial resources to maintain programs designed to ensure compliance with applicable laws and regulations and an effective audit function for testing our compliance with the Bank Secrecy Act on an ongoing basis.

The Dodd-Frank Act. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 Act (“Dodd-Frank Act”) into law. The Dodd-Frank Act will have a broad impact on the financial services industry, imposing significant regulatory and compliance changes, including the designation of certain financial companies as systemically significant, the imposition of increased capital, leverage, and liquidity requirements, and numerous other provisions designed to improve supervision and oversight of, and strengthen safety and soundness within, the financial services sector. Additionally, the Dodd-Frank Act establishes a new framework of authority to conduct systemic risk oversight within the financial system to be distributed among new and existing federal regulatory agencies, including the Financial Stability Oversight Council, or Council, the Federal Reserve, the OCC, and the FDIC.

The following items provide a brief description of certain provisions of the Dodd-Frank Act that may have an effect on us.

- The Dodd-Frank Act significantly reduces the ability of national banks to rely upon federal preemption of state consumer financial laws. Although the OCC, as the primary regulator of national banks, will have the ability to make preemption determinations where certain conditions are met, the broad rollback of federal preemption has the potential to create a patchwork of federal and state compliance obligations. This could, in turn, result in significant new regulatory requirements applicable to us and certain of our lending activities, with potentially significant changes in our operations and increases in our compliance costs. It could also result in uncertainty concerning compliance, with attendant regulatory and litigation risks.
- The Dodd-Frank Act makes permanent the general \$250,000 deposit insurance limit for insured deposits. The Dodd-Frank Act also extends until January 1, 2013, federal deposit coverage for the full net amount held by depositors in non-interest bearing transaction accounts. Amendments to the FDIC Act also revise the assessment base against which an insured depository institution’s deposit insurance premiums paid to DIF will be calculated. Under the amendments, the assessment base will no longer be the institution’s deposit base, but rather its average consolidated total assets less its average tangible equity. Additionally, the Dodd-Frank Act makes changes to the minimum designated reserve ratio of the DIF, increasing the minimum from 1.15 percent to 1.35 percent of the estimated amount of total insured deposits, and eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds. Several of these provisions could increase the FDIC deposit insurance premiums paid by us.

- The Dodd-Frank Act generally enhances the restrictions on transactions with affiliates under Section 23A and 23B of the Federal Reserve Act, including an expansion of the definition of “covered transactions” and an increase in the amount of time for which collateral requirements regarding covered credit transactions must be satisfied. Insider transaction limitations are expanded through the strengthening of loan restrictions to insiders and the expansion of the types of transactions subject to the various limits, including derivatives transactions, repurchase agreements, reverse repurchase agreements and securities lending or borrowing transactions. Restrictions are also placed on certain asset sales to and from an insider to an institution, including requirements that such sales be on market terms and, in certain circumstances, approved by the institution’s board of directors.
- The Dodd-Frank Act strengthens the existing limits on a depository institution’s credit exposure to one borrower. Federal banking law currently limits a national bank’s ability to extend credit to one person (or group of related persons) in an amount exceeding certain thresholds. The Dodd-Frank Act expands the scope of these restrictions to include credit exposure arising from derivative transactions, repurchase agreements, and securities lending and borrowing transactions.
- The Dodd-Frank Act authorizes the establishment of the Consumer Financial Protection Bureau (“the CFPB”), which has the power to issue rules governing all financial institutions that offer financial services and products to consumers. The CFPB has the authority to monitor markets for consumer financial products to ensure that consumers are protected from abusive practices. Financial institutions will be subject to increased compliance and enforcement costs associated with regulations established by the CFPB.
- The Dodd-Frank Act may create risks of “secondary actor liability” for lenders that provide financing to entities offering financial products to consumers. We may incur compliance and other costs in connection with administration of credit extended to entities engaged in activities covered by Dodd-Frank.
- The Dodd-Frank Act addresses many investor protection, corporate governance and executive compensation matters that will affect most U.S. publicly traded companies, including ours. The Dodd-Frank Act (1) grants stockholders of U.S. publicly traded companies an advisory vote on executive compensation; (2) enhances independence requirements for compensation committee members; (3) requires companies listed on national securities exchanges to adopt incentive-based compensation clawback policies for executive officers; (4) provides the SEC with authority to adopt proxy access rules that would allow stockholders of publicly traded companies to nominate candidates for election as a director and have those nominees included in a company’s proxy materials; (5) prohibits uninstructed broker votes on election of directors, executive compensation matters (including say on pay advisory votes), and other significant matters, and (6) requires disclosure on board leadership structure.

Many of the requirements of the Dodd-Frank Act will be implemented over time and most will be subject to regulations implemented over the course of several years. Given the uncertainty associated with the manner in which the provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies and through regulations, the full extent of the impact such requirements will have on our operations is unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make any changes necessary to comply with new statutory and regulatory requirements. Failure to comply with the new requirements may negatively impact our results of operations and financial condition. While we cannot predict what effect any presently contemplated or future changes in the laws or regulations or their interpretations would have on us, these changes could be materially adverse to our investors.

Available Information

Under the Securities Exchange Act of 1934, we are required to file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (“SEC”). You may read and copy any document filed by us with the SEC at the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. We file electronically with the SEC.

We make available, free of charge through our website, our reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, as soon as reasonably practicable after such reports are filed with or furnished to the SEC. Additionally, we have adopted and posted on our website a code of ethics that applies to our principal executive officer, principal financial officer and principal accounting officer. The address for our website is www.texascapitalbank.com. We will provide a printed copy of any of the aforementioned documents to any requesting shareholder.

ITEM 1A. RISK FACTORS

An investment in our common stock involves certain risks. You should consider carefully the following risks and other information in this report, including our financial information and related notes, before investing in our common stock. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

Risk Factors Associated With Our Business

We must effectively manage our credit risk. There are risks inherent in making any loan, including risks with respect to the period of time over which the loan may be repaid, risks resulting from changes in economic and industry conditions, risks inherent in dealing with individual borrowers, including increased risks of fraud perpetrated by customers of the bank and risks resulting from uncertainties as to the future value of collateral. The risk of non-payment of loans is inherent in commercial banking. Although we attempt to minimize our credit risk by carefully monitoring the concentration of our loans within specific industries and through prudent loan approval practices in all categories of our lending, we cannot assure you that such monitoring and approval procedures will reduce these lending risks. We cannot assure you that our credit administration personnel, policies and procedures will adequately adapt to changes in economic or any other conditions affecting customers and the quality of the loan portfolio.

Our results of operations and financial condition would be adversely affected if our allowance for loan losses is not sufficient to absorb actual losses. Experience in the banking industry indicates that a portion of our loans in all categories of our lending business will become delinquent, and some may only be partially repaid or may never be repaid at all. Our methodology for establishing the adequacy of the allowance for loan losses depends on subjective application of risk grades as indicators of borrowers’ ability to repay. Deterioration in general economic conditions and unforeseen risks affecting customers may have an adverse effect on borrowers’ capacity to repay timely their obligations before risk grades could reflect those changing conditions. In times of improving credit quality, with growth in our loan portfolio, the allowance for loan losses may decrease as a percent of total loans. Changes in economic and market conditions may increase the risk that the allowance would become inadequate if borrowers experience economic and other conditions adverse to their businesses. Maintaining the adequacy of our allowance for loan losses may require that we make significant and unanticipated increases in our provisions for loan losses, which would materially affect our results of operations and capital adequacy. Recognizing that many of our loans individually represent a significant percentage of our total allowance for loan losses, adverse collection experience in a relatively small number of loans could require an increase in our allowance. Federal

regulators, as an integral part of their respective supervisory functions, periodically review our allowance for loan losses. The regulatory agencies may require us to change classifications or grades on loans, increase the allowance for loan losses with large provisions for loan losses and to recognize further loan charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for loan losses required by these regulatory agencies could have a negative effect on our results of operations and financial condition.

Our growth plans are dependent on the availability of capital and funding. Our historical ability to raise capital through the sale of common stock and debt securities may become limited by market conditions beyond our control, as has been evidenced with the economic downturn and issues affecting the financial services industry. Due to changes in regulation, trust preferred is no longer viable as source of long-term debt capital, and treatment of trust preferred as capital may be changed by regulation prior to the maturity of the trust preferred. Change in capital treatment of trust preferred may require the Company to issue securities at times and with maturity, conditions, and rates that are disadvantageous. Pricing of capital, in terms of interest or dividend requirements or dilutive impact on earnings available to shareholders, has increased dramatically, and an increase in costs of capital can have a direct impact on operating performance and the ability to achieve growth objectives. Costs of funding could also increase dramatically and affect our growth objectives, as well as our financial performance. Additionally, the FDIC's guarantee on non-interest bearing deposits was extended to December 31, 2012 but subsequent to that date we could be adversely affected in our ability to attract and maintain non-interest bearing deposits as a source of cost-effective funding. Adverse changes in operating performance or financial condition or changes in statutory or regulatory requirements could make raising additional capital difficult or extremely expensive.

Our operations are significantly affected by interest rate levels. Our profitability is dependent to a large extent on our net interest income, which is the difference between interest income we earn as a result of interest paid to us on loans and investments and interest we pay to third parties such as our depositors and those from whom we borrow funds. Like most financial institutions, we are affected by changes in general interest rate levels, which are currently at record low levels, and by other economic factors beyond our control. Prolonged periods of unusually low interest rates may have an adverse effect on earnings or returns by reducing yields on loans and other earning assets and by reducing the value of demand deposits, stockholders' equity and fixed rate liabilities with rates higher than available earning assets. Interest rate risk can result from mismatches between the dollar amount of repricing or maturing assets and liabilities and from mismatches in the timing and rate at which our assets and liabilities reprice. Although we have implemented strategies which we believe reduce the potential effects of changes in interest rates on our results of operations, these strategies will not always be successful. In addition, any substantial and prolonged increase in market interest rates could reduce our customers' desire to borrow money from us or adversely affect their ability to repay their outstanding loans by increasing their costs since most of our loans have adjustable interest rates that reset periodically. If our borrowers' ability to repay is affected, our level of non-performing assets would increase and the amount of interest earned on loans would decrease, thereby having an adverse effect on operating results. Any of these events could adversely affect our results of operations or financial condition.

Our business faces unpredictable economic and business conditions. General economic conditions and specific business conditions impact the banking industry and our customers' businesses. The credit quality of our loan portfolio necessarily reflects, among other things, the general economic conditions in the areas in which we conduct our business. Our continued financial success depends somewhat on factors beyond our control, including:

- national and local economic conditions, as well as general economic consequences of international conditions, such as weakness in European sovereign debt and the impact of that weakness on the US and global economies;
- incidence of customer fraud evident at times of severe economic weakness;
- the supply and demand for investable funds;

- interest rates; and
- federal, state and local laws affecting these matters.

Substantial deterioration in any of the foregoing conditions, as we have experienced with the current economic downturn, can have a material adverse effect on our results of operations and financial condition, and we may not be able to sustain our historical rate of growth. Our bank's customer base is primarily commercial in nature, and our bank does not have a significant branch network or retail deposit base. In periods of economic downturn, business and commercial deposits may tend to be more volatile than traditional retail consumer deposits and, therefore, during these periods our financial condition and results of operations could be adversely affected to a greater degree than our competitors that have a larger retail customer base. We rely on investors to purchase our loans held for sale participations in a timely manner. Due to industry and economic conditions, investors may slow their purchase or refuse to purchase the loans.

We are dependent upon key personnel. Our success depends to a significant extent upon the performance of certain key employees, the loss of whom could have an adverse effect on our business. Although we have entered into employment agreements with certain employees, we cannot assure you that we will be successful in retaining key employees.

Our business is concentrated in Texas and a downturn in the economy of Texas may adversely affect our business. A substantial majority of our business is located in Texas. As a result, our financial condition and results of operations may be affected by changes in the Texas economy. A prolonged period of economic recession or other adverse economic conditions in Texas may result in an increase in non-payment of loans, a decrease in collateral value and higher incidence of fraud.

Our business strategy focuses on organic growth within our target markets and, if we fail to manage our growth effectively, it could negatively affect our operations. We intend to develop our business principally through organic growth. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in significant growth stages of development. In order to execute our growth strategy successfully, we must, among other things:

- identify and expand into suitable markets and lines of business;
- build our customer base;
- maintain credit quality;
- attract sufficient deposits to fund our anticipated loan growth;
- attract and retain qualified bank management in each of our targeted markets;
- identify and pursue suitable opportunities for opening new banking locations;
- maintain adequate regulatory capital; and
- maintain sufficient infrastructure to support growth, including meeting increasing regulatory requirements.

Failure to manage our growth effectively could have a material adverse effect on our business, future prospects, financial condition or results of operations, and could adversely affect our ability to successfully implement our business strategy.

Our business is susceptible to fraud. As a financial institution, we may experience fraud risk with our loan customers and deposit customers, both directly and indirectly. As a lender we rely on financial data which could turn out to be fraudulent, both when we're the originator of a loan or when we are purchasing participation interests in loans originated by others. We believe we have the underwriting and operational controls in place to prevent or detect, but in some cases of collusion with multiple parties the fraud might not be readily detected and could result in losses that would affect our financial results. In addition, our lending customers could experience fraud in their business which would have an effect on their ability to repay us. Our deposit customers could be victims of fraud that may not result from ineffective controls on our part, but we could be expected to share in losses as a result of, and as a means to maintain, our relationship with the customer.

We compete with many larger financial institutions which have substantially greater financial resources than we have. Competition among financial institutions in Texas is intense. We compete with other financial and bank holding companies, state and national commercial banks, savings and loan associations, consumer finance companies, credit unions, securities brokerages, insurance companies, mortgage banking companies, money market mutual funds, asset-based non-bank lenders and other financial institutions. Many of these competitors have substantially greater financial resources, lending limits and larger branch networks than we do, and are able to offer a broader range of products and services than we can. Failure to compete effectively for deposit, loan and other banking customers in our markets could cause us to lose market share, slow our growth rate and may have an adverse effect on our financial condition and results of operations.

The risks involved in commercial lending may be material. We generally invest a greater proportion of our assets in commercial loans than other banking institutions of our size, and our business plan calls for continued efforts to increase our assets invested in these loans. Commercial loans may involve a higher degree of credit risk than some other types of loans due, in part, to their larger average size, the effects of changing economic conditions on commercial loans, the dependency on the cash flow of the borrowers' businesses to service debt, the sale of assets securing the loans, and disposition of collateral which may not be readily marketable. Losses incurred on a relatively small number of commercial loans could have a materially adverse impact on our results of operations and financial condition.

Real estate lending in our core Texas markets involves risks related to a decline in value of commercial and residential real estate. Our real estate lending activities, and the exposure to fluctuations in real estate values, are significant and expected to increase. The market value of real estate can fluctuate significantly in a relatively short period of time as a result of market conditions in the geographic area in which the real estate is located. If the value of the real estate serving as collateral for our loan portfolio were to decline materially, a significant part of our loan portfolio could become under-collateralized and we may not be able to realize the amount of security that we anticipated at the time of originating the loan. Conditions in certain segments of the real estate industry, including homebuilding, lot development and mortgage lending, may have an effect on values of real estate pledged as collateral in our markets. The inability of purchasers of real estate, including residential real estate, to obtain financing may weaken the financial condition of borrowers dependent on the sale or refinancing of property. Failure to sell some loans held for sale in accordance with contracted terms may result in mark to market charges to other operating income. In addition, after the mark to market, we may transfer the loans into the loans held for investment portfolio where they will then be subject to changes in grade, classification, accrual status, foreclosure, or loss which could have an effect on the adequacy of the allowance for loan losses. When conditions warrant, we may find it beneficial to restructure loans to improve prospects of collectability, and such actions may require loans to be treated as troubled debt restructurings and/or non-performing loans.

We are subject to environmental liability risk associated with lending activities. A significant portion of our loan portfolio is secured by real property. During the ordinary course of business, we may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, we may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require us to incur substantial expenses and may materially reduce the affected property's value or limit our ability to use or sell the affected property. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability. Although we have policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on our financial condition and results of operations.

Our future profitability depends, to a significant extent, upon revenue we receive from our middle market business customers and their ability to meet their loan obligations. Our future profitability depends, to a significant extent, upon revenue we receive from middle market business customers, and their ability to continue to

meet existing loan obligations. As a result, adverse economic conditions or other factors adversely affecting this market segment may have a greater adverse effect on us than on other financial institutions that have a more diversified customer base.

System failure or breaches of our network security could subject us to increased operating costs as well as litigation and other liabilities. The computer systems and network infrastructure we use could be vulnerable to unforeseen problems. Our operations are dependent upon our ability to protect our computer equipment against damage from fire, power loss, telecommunications failure or a similar catastrophic event and our reliance on third party service providers who provide many of our technology services. Any damage or failure that causes an interruption in our operations could have an adverse effect on our customers. In addition, we must be able to protect the computer systems and network infrastructure utilized by us against physical damage, security breaches and service disruption caused by the Internet or other users. Such computer break-ins and other disruptions would jeopardize the security of information stored in and transmitted through our computer systems and network infrastructure, which may result in significant liability to us and deter potential customers. Although we, with the help of third-party service providers, will continue to implement security technology and establish operational procedures to prevent such damage, there can be no assurance that these security measures will be successful. In addition, the failure of our customers to maintain appropriate security for their systems may increase our risk of loss. We have and will continue to incur costs with the training of our customers about protection of their systems. However, we cannot be assured that this training will be adequate to avoid risk to our customers or, under unknown circumstances to us.

We are subject to extensive government regulation and supervision. We are subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not shareholders. Federal regulation is also designed to cause the banking system to support governmental policies that may not be beneficial to our bank. These regulations affect our lending practices, capital structure, investment practices, dividend policy, operations and growth, among other things. These regulations also impose obligations to maintain appropriate policies, procedures and controls, among other things, to detect, prevent and report money laundering and terrorist financing and to verify the identities of our customers. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible changes. Changes to statutes, regulations or regulatory policies, including changes in interpretation or implementation of statutes, regulations or policies, could affect us in substantial and unpredictable ways. The changes in regulation and requirements imposed on financial institutions, such as the Dodd-Frank Act and Basel III accords, could subject us to additional costs, impose requirements for additional capital, limit the types of financial services and products we may offer and/or increase the ability of non-banks to offer competing financial services and products, among other things. Over a year after the adoption of the Dodd-Frank Act, there are still many related regulations that have not been written, so the effects of those are unknown at this time. We expend substantial effort and incur costs to improve our systems, audit capabilities, staffing and training in order to satisfy regulatory requirements, but the regulatory authorities may determine that such efforts are insufficient. Failure to comply with relevant laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputation damage, which could have a material adverse effect on our business, financial condition and results of operations. While we have policies and procedures designed to prevent any such violations, there can be no assurance that such violations will not occur. In addition, the FDIC has imposed higher general and special assessments on deposits based on general industry conditions and as a result of changes in specific programs, and there is no restriction on the amount by which the FDIC may increase deposit assessments in the future. These increased FDIC assessments have affected our earnings to a significant degree, and the industry may be subject to additional assessments, fees or taxes.

Furthermore, Sarbanes-Oxley, and the related rules and regulations promulgated by the SEC and Financial Industry Regulatory Authority ("FINRA") that are applicable to us, have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices. As a result, we have experienced, and may continue to experience, greater compliance costs.

Severe weather, natural disasters, acts of war or terrorism and other external events could significantly impact our business. Severe weather, natural disasters, acts of war or terrorism and other adverse external events could have a significant impact on our ability to conduct business. Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. Periodically, hurricanes have caused extensive flooding and destruction along the coastal areas of Texas, including communities where we conduct business, and our operations in Houston have been disrupted to a minor degree. While the impact of these hurricanes did not significantly affect us, other severe weather or natural disasters, acts of war or terrorism or other adverse external events may occur in the future. Although management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Our management maintains significant control over us. Our current executive officers and directors beneficially own approximately 5% of the outstanding shares of our common stock. Accordingly, our current executive officers and directors are able to influence, to a significant extent, the outcome of all matters required to be submitted to our stockholders for approval (including decisions relating to the election of directors) and other significant corporate matters.

There are substantial regulatory limitations on changes of control. With certain limited exceptions, federal regulations prohibit a person or company or a group of persons deemed to be “acting in concert” from, directly or indirectly, acquiring more than 10% (5% if the acquirer is a bank holding company) of any class of our voting stock or obtaining the ability to control in any manner the election of a majority of our directors or otherwise direct the management or policies of our company without prior notice or application to and the approval of the Federal Reserve. Accordingly, prospective investors need to be aware of and comply with these requirements, if applicable, in connection with any purchase of shares of our common stock.

Anti-takeover provisions of our certificate of incorporation, bylaws and Delaware law may make it more difficult for you to receive a change in control premium. Certain provisions of our certificate of incorporation and bylaws could make a merger, tender offer or proxy contest more difficult, even if such events were perceived by many of our stockholders as beneficial to their interests. These provisions include advance notice for nominations of directors and stockholders’ proposals, and authority to issue “blank check” preferred stock with such designations, rights and preferences as may be determined from time to time by our board of directors. In addition, as a Delaware corporation, we are subject to Section 203 of the Delaware General Corporation Law which, in general, prevents an interested stockholder, defined generally as a person owning 15% or more of a corporation’s outstanding voting stock, from engaging in a business combination with our company for three years following the date that person became an interested stockholder unless certain specified conditions are satisfied.

We are subject to contract claims and litigation pertaining to lending activities, employment practices, fiduciary responsibility related to our wealth management services and other general business matters. From time to time, customers make claims and take legal action pertaining to our performance of any of the above. Whether customer claims and legal action related to our performance are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to us they may result in significant financial liability which could require us to increase capital and/or adversely affect the market perception of us and our products and services as well as impact customer demand for those products and services. In addition, employees can make claims related to our employment practices. If such claims or legal actions are not resolved in a manner favorable to us they may result in significant financial liability and/or adversely affect the market perception of us. Any financial liability or reputation damage could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Our controls and procedures may fail or be circumvented. Management regularly reviews and updates our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and

can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, results of operations and financial condition.

New lines of business or new products and services may subject us to additional risks. From time to time, we may develop and grow new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of our system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on our business, results of operations and financial condition. All service offerings, including current offerings and those which may be provided in the future, may become more risky due to changes in economic, competitive and market conditions beyond our control.

Risks Associated With Our Common Stock

Our stock price can be volatile. Stock price volatility may make it more difficult for you to resell your common stock when you want and at prices you find attractive. Our stock price can fluctuate significantly in response to a variety of factors including, among other things:

- actual or anticipated variations in quarterly results of operations;
- recommendations by securities analysts;
- operating and stock price performance of other companies that investors deem comparable to us;
- news reports relating to trends, concerns and other issues in the financial services industry, including the failures of other financial institutions in the current economic downturn;
- perceptions in the marketplace regarding us and/or our competitors;
- new technology used, or services offered, by competitors;
- significant acquisitions or business combinations, strategic partnerships, joint ventures or capital commitments by or involving us or our competitors;
- changes in government regulations; and
- geopolitical conditions such as acts or threats of terrorism or military conflicts.

General market fluctuations, industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends, could also cause our stock price to decrease regardless of operating results as evidenced by the current volatility and disruption of capital and credit markets.

The trading volume in our common stock is less than that of other larger financial services companies. Although our common stock is traded on the Nasdaq Global Select Market, the trading volume in our common stock is less than that of other larger financial services companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of willing buyers and sellers of our common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which we have no control. Given the lower trading volume of our common stock, significant sales of our common stock, or the expectation of these sales, could cause our stock price to fall. In addition, a substantial majority of common stock outstanding is held by institutional shareholders, and trading activity involving large positions may increase volatility of the stock price.

An investment in our common stock is not an insured deposit. Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any other deposit insurance fund or by any other public or private entity. Investment in our common stock is inherently risky for the reasons described in this “Risk Factors” section and elsewhere in this report and is subject to the same market forces that affect the price of common stock in any company. As a result, if you acquire our common stock, you may lose some or all of your investment.

The holders of our junior subordinated debentures have rights that are senior to those of our shareholders. As of December 31, 2011, we had \$113.4 million in junior subordinated debentures outstanding that were issued to our statutory trusts. The trusts purchased the junior subordinated debentures from us using the proceeds from the sale of trust preferred securities to third party investors. Payments of the principal and interest on the trust preferred securities are conditionally guaranteed by us to the extent not paid or made by each trust, provided the trust has funds available for such obligations.

Our junior subordinated debentures are senior to our shares of common stock. As a result, we must make payments on our junior subordinated debentures (and the related trust preferred securities) before any dividends can be paid on our common stock and, in the event of our bankruptcy, dissolution or liquidation, the holders of the debentures must be satisfied before any distributions can be made to our shareholders. If certain conditions are met, we have the right to defer interest payments on the junior subordinated debentures (and the related trust preferred securities) at any time or from time to time for a period not to exceed 20 consecutive quarters in a deferral period, during which time no dividends may be paid to holders of our common stock.

We do not currently pay dividends. Our ability to pay dividends is limited and we may be unable to pay future dividends. We do not currently pay dividends on our common stock. Our ability to pay dividends is limited by regulatory restrictions and the need to maintain sufficient consolidated capital. The ability of our bank subsidiary, Texas Capital Bank, to pay dividends to us is limited by its obligations to maintain sufficient capital and by other general restrictions on its dividends that are applicable to our regulated bank subsidiary. If these regulatory requirements are not met, our subsidiary bank will not be able to pay dividends to us, and we could be unable to pay dividends on our common stock or meet debt or other contractual obligations.

Risks Associated With Our Industry

The earnings of financial services companies are significantly affected by general business and economic conditions. As a financial services company, our operations and profitability are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, economic conditions in foreign markets, political issues, legislative and regulatory changes, fluctuation in both debt and equity capital markets, broad trends in industry and finance and the strength of the U.S. economy and the local economies in which we operate, all of which are beyond our control. Continued weakness or further deterioration in economic conditions could result in decreases in loan collateral values and increases in loan delinquencies, non-performing assets and losses on loans and other real estate acquired through foreclosure of loans. Industry conditions, competition and the performance of our bank could also result in a decrease in demand for our products and services, among other things, any of which could have a material adverse impact on our results of operations and financial condition.

There can be no assurance that recent and future legislation will not subject us to heightened regulation, and the impact of such legislation on us cannot be reliably determined at this time. On July 21, 2010, President Obama signed into law the Dodd-Frank Act, which imposes significant regulatory and compliance changes. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make any changes necessary to comply with the new statutory and regulatory requirements. Failure to comply with the new requirements or with any future changes in laws or regulations may negatively impact our results of operations and financial

condition. We cannot predict what additional legislation may be enacted affecting banks and bank holding companies and their operations, or what regulations might be adopted by bank regulators or the effects thereof. In light of current economic conditions in the financial markets and the United States economy, Congress and regulators have increased their focus on the regulation of the banking industry. If enacted, any new legislative or regulatory initiatives could affect us in substantial and unpredictable ways, including increased compliance costs and additional operating restrictions on our business, and could result in an adverse effect on our business, financial condition and results of operations.

Financial services companies depend on the accuracy and completeness of information about customers and counterparties. In deciding whether to extend credit or enter into other transactions, we may rely on information furnished by or on behalf of customers and counterparties, including financial statements, credit reports and other financial information. We may also rely on representations of those customers, counterparties or other third parties, such as independent auditors, as to the accuracy and completeness of that information. Reliance on inaccurate or misleading financial statements, credit reports or other financial information could have a material adverse impact on our business and, in turn, our results of operations and financial condition.

We compete in an industry that continually experiences technological change, and we may have fewer resources than many of our competitors to continue to invest in technological improvements. The financial services industry is undergoing rapid technological changes, with frequent introductions of new technology-driven products and services which our customers may require. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

Consumers and businesses may decide not to use banks to complete their financial transactions. Technology and other changes are allowing parties to complete financial transactions that historically have involved banks through alternative methods. The possibility of eliminating banks as intermediaries could result in the loss of interest and fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and the lower cost deposits as a source of funds could have a material adverse effect on our results of operations and financial condition.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

As of December 31, 2011, we conducted business at thirteen full service banking locations and one operations center. Our operations center houses our loan and deposit operations and the BankDirect call center. We lease the space in which our banking centers and the operations call center are located. These leases expire between March 2013 and May 2021, not including any renewal options that may be available.

The following table sets forth the location of our executive offices, operations center and each of our banking centers.

Type of Location	Address
Executive offices, banking location	2000 McKinney Avenue <i>Banking Center</i> — Suite 190 <i>Executive Offices</i> — Suite 700 Dallas, Texas 75201
Operations center, banking location	2350 Lakeside Drive <i>Banking Center</i> — Suite 105 <i>Operations Center</i> — Suite 800 Richardson, Texas 75082
Banking location	14131 Midway Road Suite 100 Addison, Texas 75001
Banking location	5910 North Central Expressway Suite 150 Dallas, Texas 75206
Banking location	5800 Granite Parkway Suite 150 Plano, Texas 75024
Executive offices	500 Throckmorton Suite 300 Fort Worth, Texas 76102
Banking location	570 Throckmorton Fort Worth, Texas 76102
Executive offices, banking location	114 West 7 th Street <i>Banking center</i> — Suite 100 <i>Executive offices</i> — Suite 300 Austin, Texas 78701
Banking location	3818 Bee Caves Road Austin, Texas 78746
Banking location	One Chisholm Trail Suite 225 Round Rock, Texas 78681
Executive offices, banking location	745 East Mulberry Street <i>Banking center</i> — Suite 150 <i>Executive offices</i> — Suite 350 San Antonio, Texas 78212
Banking location	7373 Broadway Suite 100 San Antonio, Texas 78209
Executive offices, banking location	One Riverway <i>Banking center</i> — Suite 150 <i>Executive offices</i> — Suite 2100 Houston, Texas 77056
Banking location	Westway II 4424 West Sam Houston Parkway N. Suite 170 Houston, TX 77041

ITEM 3. LEGAL PROCEEDINGS

We are aggressively defending against a \$65.4 million jury verdict that was rendered in August 2011, in Antlers, Oklahoma, a town in rural Pushmataha County. The case was filed by one of the guarantors of a defaulted loan. A judgment has been entered by the trial court. We are pursuing a dismissal of the suit, a change in verdict or a new trial. We will appeal any further adverse judgment that is entered. We have been advised by counsel that there are numerous grounds for dismissal, change in verdict and any appeal.

In addition, we intend to pursue aggressively our suit filed in Texas in April 2010 against the plaintiff in the Oklahoma case and other guarantors of the defaulted loan. The loss related to the loan was recognized in the second quarter of 2010, and we have no remaining balance sheet exposure on the principal balance of the loan. As we currently believe a materially negative outcome in this matter is not probable, we have not established a reserve related to any potential exposure.

We are also involved in legal proceedings occurring in the ordinary course of business. Management believes that none of these legal proceedings, individually or in the aggregate, will have a material adverse impact on our results of operations or financial condition.

ITEM 4. [REMOVED AND RESERVED]

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on The Nasdaq Global Select Market under the symbol "TCBI". On February 22, 2012, there were approximately 291 holders of record of our common stock.

No cash dividends have ever been paid by us on our common stock, and we do not anticipate paying any cash dividends in the foreseeable future. Our principal source of funds to pay cash dividends on our common stock would be cash dividends from our bank. The payment of dividends by our bank is subject to certain restrictions imposed by federal and state banking laws, regulations and authorities.

The following table presents the range of high and low bid prices reported on The Nasdaq Global Select Market for each of the four quarters of 2010 and 2011.

Quarter Ended	Price Per Share	
	High	Low
March 31, 2010	19.39	13.75
June 30, 2010	21.45	14.86
September 30, 2010	18.85	15.03
December 31, 2010	22.73	16.65
March 31, 2011	26.48	20.20
June 30, 2011	26.79	23.96
September 30, 2011	29.48	21.39
December 31, 2011	30.98	21.70

Equity Compensation Plan Information

The following table presents certain information regarding our equity compensation plans as of December 31, 2011.

Plan category	Number of Securities To Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans
Equity compensation plans approved by security holders	2,214,602	\$16.31	447,065
Equity compensation plans not approved by security holders	—	—	—
Total	2,214,602	\$16.31	447,065

Stock Performance Graph

The following table and graph sets forth the cumulative total stockholder return for the Company's common stock beginning on August 12, 2003, the date of the Company's initial public offering compared to an overall stock market index (Russell 2000 Index) and the Company's peer group index (Nasdaq Bank Index). The Russell 2000 Index and Nasdaq Bank Index are based on total returns assuming reinvestment of dividends. The graph assumes an investment of \$100 on August 12, 2003. The performance graph represents past performance and should not be considered to be an indication of future performance.

ITEM 7. *MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*

Forward-Looking Statements

Statements and financial analysis contained in this document that are not historical facts are forward looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 (the "Act"). In addition, certain statements may be contained in our future filings with SEC, in press releases, and in oral and written statements made by or with our approval that are not statements of historical fact and constitute forward-looking statements within the meaning of the Act. Forward looking statements describe our future plans, strategies and expectations and are based on certain assumptions. Words such as "believes", "anticipates", "expects", "intends", "targeted", "continue", "remain", "will", "should", "may" and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements involve risks and uncertainties, many of which are beyond our control that may cause actual results to differ materially from those in such statements. The important factors that could cause actual results to differ materially from the forward looking statements include, but are not limited to, the following:

- 1) Changes in interest rates and the relationship between rate indices, including LIBOR and Fed Funds
- 2) Changes in the levels of loan prepayments, which could affect the value of our loans or investment securities
- 3) Changes in general economic and business conditions in areas or markets where we compete
- 4) Competition from banks and other financial institutions for loans and customer deposits
- 5) The failure of assumptions underlying the establishment of and provisions made to the allowance for credit losses and differences in assumptions utilized by banking regulators which could have retroactive impact
- 6) The loss of senior management or operating personnel and the potential inability to hire qualified personnel at reasonable compensation levels
- 7) Changes in government regulations including changes as a result of the recent economic crisis. On July 21, 2010, the Dodd-Frank Act was signed into law. The Dodd-Frank Act represents a significant overhaul of many aspects of the regulation of the financial services industry. Many of the related regulations are still not written so the potential impact is still unknown.
- 8) Claims and litigation, whether founded or unfounded, may result in significant financial liability if legal actions are not resolved in a manner favorable to us.

Forward-looking statements speak only as of the date on which such statements are made. We have no obligation to update or revise any forward looking statements as a result of new information or future events. In light of these assumptions, risks and uncertainties, the events discussed in any forward looking statements in this annual report might not occur.

Overview of Our Business Operations

We commenced our banking operations in December 1998. An important aspect of our growth strategy has been our ability to service and effectively manage a large number of loans and deposit accounts in multiple markets in Texas. Accordingly, we created an operations infrastructure sufficient to support state-wide lending and banking operations.

The following discussions and analyses present the significant factors affecting our financial condition as of December 31, 2011 and 2010 and results of operations for each of the three years in the period ended December 31, 2011. This discussion should be read in conjunction with our consolidated financial statements and notes to the financial statements appearing later in this report. Please also note the below

description about our discontinued operations and how it is reflected in the following discussions of our financial condition and results of operations.

On October 16, 2006, we completed the sale of our residential mortgage lending division (“RML”). The sale was effective as of September 30, 2006, and, accordingly, all operating results for this discontinued component of our operations were reclassified to discontinued operations. All prior periods were restated to reflect the change. Subsequent to the end of the first quarter of 2007, Texas Capital Bank and the purchaser of its residential mortgage loan division (RML) agreed to terminate and settle the contractual arrangements related to the sale of the division.

The loss from discontinued operations was \$126,000 and \$136,000, net of taxes, for the years 2011 and 2010, respectively. The 2011 losses are primarily related to continuing legal and salary expenses incurred in dealing with the remaining loans and requests from investors related to the repurchase of previously sold loans. We still have approximately \$393,000 in loans held for sale from discontinued operations that are carried at the estimated market value at year-end, which is less than the original cost. We plan to sell these loans, but timing and price to be realized cannot be determined at this time due to market conditions. In addition, we will address any future requests from investors related to repurchasing loans previously sold. While the balances as of December 31, 2011 include a liability for exposure to additional contingencies, including risk of having to repurchase loans previously sold, we recognize that market conditions may result in additional exposure to loss and the extension of time necessary to complete the discontinued mortgage operation. Our mortgage warehouse lending operations were not part of the sale, and are included in the results from continuing operations. Except as otherwise noted, all amounts and disclosures throughout this document reflect only the Company’s continuing operations.

Year ended December 31, 2011 compared to year ended December 31, 2010

We reported net income of \$76.1 million, or \$1.99 per diluted common share, for the year ended December 31, 2011, compared to \$37.3 million, or \$1.00 per diluted common share, for the same period in 2010. Return on average equity was 13.39% and return on average assets was 1.12% for the year ended December 31, 2011, compared to 7.23% and .63%, respectively, for the same period in 2010.

Net income increased \$38.8 million, or 104%, for the year ended December 31, 2011 compared to the same period in 2010. The \$38.8 million increase was primarily the result of a \$61.3 million increase in net interest income and a \$25.0 million decrease in the provision for credit losses, offset by a \$24.7 million increase in non-interest expense, and a \$22.7 million increase in income tax expense.

Details of the changes in the various components of net income are further discussed below.

Year ended December 31, 2010 compared to year ended December 31, 2009

We reported net income of \$37.3 million for the year ended December 31, 2010, compared to \$24.4 million for the same period in 2009. We reported net income available to common shareholders of \$37.3 million, or \$1.00 per diluted common share, for the year ended December 31, 2010, compared to \$19.0 million, or \$.55 per diluted common share, for the same period in 2009 as a result of preferred dividends paid in 2009. Return on average equity was 7.23% and return on average assets was .63% for the year ended December 31, 2010, compared to 5.15% and .46%, respectively, for the same period in 2009.

Net income increased \$12.9 million, or 53%, for the year ended December 31, 2010, and net income available to common shareholders increased \$18.3 million, or 96%, compared to the same period in 2009. The \$12.9 million increase was primarily the result of a \$45.0 million increase in net interest income and a \$3.0 million increase in non-interest income, offset by a \$10.0 million increase in the provision for credit losses and a \$17.9 million increase in non-interest expense, and a \$7.1 million increase in income tax expense.

Details of the changes in the various components of net income are further discussed below.

Net Interest Income

Net interest income was \$302.9 million for the year ended December 31, 2011 compared to \$241.7 million for the same period of 2010. The increase in net interest income was primarily due to an increase of \$819.4

million in average earning assets and the increase in our net interest margin. The increase in average earning assets from 2010 included a \$915.4 million increase in average net loans offset by a \$65.6 million decrease in average securities. For the year ended December 31, 2011, average net loans and securities represented 96% and 2%, respectively, of average earning assets compared to 93% and 4%, respectively, in 2010.

Average interest bearing liabilities for the year ended December 31, 2011 increased \$393.7 million from the year ended December 31, 2010, which included a \$48.5 million decrease in interest bearing deposits and a \$442.3 million increase in other borrowings. At the beginning of the year we actively turned away certain higher priced deposits. For the same periods, the average balance of demand deposits increased to \$1.5 billion from \$1.1 billion. The average cost of interest bearing liabilities decreased from 0.89% for the year ended December 31, 2010 to 0.40% in 2011, reflecting the continued low market interest rates, and our focus on reducing deposit rates.

Net interest income was \$241.7 million for the year ended December 31, 2010 compared to \$196.7 million for the same period of 2009. The increase in net interest income was primarily due to an increase of \$593.7 million in average earning assets and the increase in our net interest margin. The increase in average earning assets from 2009 included a \$546.1 million increase in average net loans offset by a \$92.0 million decrease in average securities. For the year ended December 31, 2010, average net loans and securities represented 93% and 4%, respectively, of average earning assets compared to 93% and 6%, respectively, in 2009.

Average interest bearing liabilities for the year ended December 31, 2010 increased \$222.2 million from the year ended December 31, 2009, which included a \$964.5 million increase in interest bearing deposits and a \$742.2 million decrease in other borrowings. For the same periods, the average balance of demand deposits increased to \$1.1 billion from \$760.8 million. The average cost of interest bearing liabilities decreased from 1.14% for the year ended December 31, 2009 to 0.89% in 2010, reflecting the continued low market interest rates, and our focus on reducing deposit rates.

- (1) Changes attributable to both volume and yield/rate are allocated to both volume and yield/rate on an equal basis.
- (2) Taxable equivalent rates used where applicable assuming a 35% tax rate.

Net interest margin from continuing operations, the ratio of net interest income to average earning assets, increased from 4.28% in 2010 to 4.68% in 2011. This 40 basis point increase was a result of a decline in the costs of interest bearing liabilities and growth in non-interest bearing deposits. Total cost of funding decreased from .64% for 2010 to .27% for 2011. Also contributing to the increase in net interest margin was a 2 basis point increase in the yield on earning assets from 2010.

Net interest margin from continuing operations, the ratio of net interest income to average earning assets, increased from 3.89% in 2009 to 4.28% in 2010. This 39 basis point increase was a result of a decline in the costs of interest bearing liabilities and growth in non-interest bearing deposits. Total cost of funding decreased from .87% for 2009 to .64% for 2010. Also contributing to the increase in net interest margin was a 14 basis point increase in the yield on earning assets from 2009.

(1) The loan averages include loans on which the accrual of interest has been discontinued and are stated net of unearned income. Loan interest income includes loan fees totaling \$27.5 million, \$20.0 million and \$17.1 million for the years ended December 31, 2011, 2010 and 2009, respectively.

(2) Taxable equivalent rates used where applicable assuming a 35% tax rate.

Non-interest income

	Year ended December 31		
	2011	2010	2009
	<i>(in thousands)</i>		
Service charges on deposit accounts	\$ 6,480	\$ 6,392	\$ 6,287
Trust fee income	4,219	3,846	3,815
Bank owned life insurance (BOLI) income	2,095	1,889	1,579
Brokered loan fees	11,335	11,190	9,043
Equipment rental income	1,905	4,134	5,557
Other(1)	6,198	4,812	2,979
Total non-interest income	\$32,232	\$32,263	\$29,260

(1) Other income includes such items as letter of credit fees, swap fees and other general operating income, none of which account for 1% or more of total interest income and non-interest income.

Non-interest income decreased slightly during the year ended December 31, 2011 to \$32.2 million, compared to \$32.3 million during the same period in 2010. The decrease was primarily due to a \$2.2 million decrease in equipment rental income related to a decline in the leased equipment portfolio. Offsetting this decrease was a \$1.4 million increase in other non-interest income primarily related to an increase in swap fees during 2011. Swap fees are fees related to customer swap transactions and are received from the institution that is our counterparty on the transaction. See Note 20 – Derivative Financial Instruments for further discussion.

Non-interest income increased by \$3.0 million, or 10%, during the year ended December 31, 2010 to \$32.3 million, compared to \$29.3 million during the same period in 2009. The increase was primarily due to an increase in brokered loan fees, which increased \$2.2 million to \$11.2 million for the year ended December 31, 2010, compared to \$9.0 million for the same period in 2009 due to an increase in our mortgage warehouse lending volume. Other non-interest income increased \$1.8 million primarily related to losses on sale of assets we experienced in 2009 not recurring in 2010, as well as an increase in swap fees during 2010. These increases were offset by a \$1.4 million decrease in equipment rental income related to a decline in the leased equipment portfolio.

While management expects continued growth in non-interest income, the future rate of growth could be affected by increased competition from nationwide and regional financial institutions and by decreased demand in mortgage warehouse lending volume. In order to achieve continued growth in non-interest income, we may need to introduce new products or enter into new markets. Any new product introduction or new market entry could place additional demands on capital and managerial resources.

Non-interest Expense

	Year ended December 31		
	2011	2010	2009
	<i>(in thousands)</i>		
Salaries and employee benefits	\$100,535	\$ 85,298	\$ 73,419
Net occupancy expense	13,657	12,314	12,291
Leased equipment depreciation	1,482	3,297	4,319
Marketing	11,109	5,419	3,034
Legal and professional	14,996	11,837	11,846
Communications and technology	9,608	8,511	6,510
FDIC insurance assessment	7,543	9,202	8,464
Allowance and other carrying costs for OREO	9,586	10,404	10,345
Other(1)	19,685	17,206	15,314
Total non-interest expense	\$188,201	\$163,488	\$145,542

- (1) Other expense includes such items as courier expenses, regulatory assessments other than FDIC insurance, due from bank charges and other general operating expenses, none of which account for 1% or more of total interest income and non-interest income.

Non-interest expense for the year ended December 31, 2011 increased \$24.7 million compared to the same period of 2010 primarily related to increases in salaries and employee benefits, marketing expense and legal and professional expenses.

Salaries and employee benefits expense increased \$15.2 million to \$100.5 million during the year ended December 31, 2011. This increase resulted primarily from general business growth.

Leased equipment depreciation expense decreased by \$1.8 million during the year ended December 31, 2011 due to the decline in the leased equipment portfolio.

Marketing expense for the year ended December 31, 2011 increased \$5.7 million compared to the same period in 2010. Marketing expense for the year ended December 31, 2011 included \$669,000 of direct marketing and advertising expense and \$2.6 million in business development expense compared to \$246,000 and \$2.2 million, respectively, in 2010. Marketing expense for the year ended December 31, 2011 also included \$7.8 million for the purchase of miles related to the American Airlines AAdvantage® program and other treasury management deposit programs compared to \$3.0 million during 2010. Marketing may increase as we seek to further develop our brand, reach more of our target customers and expand in our target markets.

Legal and professional expense increased \$3.2 million, or 27%, for the year ended December 31, 2011 compared to the same period in 2010. Our legal and professional expense will continue to fluctuate from year to year and could increase in the future as we respond to continued regulatory changes and strategic initiatives, but we should see a decrease in the cost of resolving problem assets under improving economic conditions.

Communications and technology expense increased \$1.1 million to \$9.6 million during the year ended December 31, 2011 as a result of general business and customer growth.

FDIC insurance assessment expense decreased by \$1.7 million from \$9.2 million in 2010 to \$7.5 million as a result of changes to the FDIC assessment method.

Non-interest expense for the year ended December 31, 2010 increased \$17.9 million compared to the same period of 2009 primarily related to increases in salaries and employee benefits, marketing expense and FDIC assessment expenses.

Salaries and employee benefits expense increased \$11.9 million to \$85.3 million during the year ended December 31, 2010. This increase resulted primarily from general business growth.

Leased equipment depreciation expense decreased by \$1.0 million during the year ended December 31, 2010 due to the decline in the leased equipment portfolio.

Marketing expense for the year ended December 31, 2010 increased \$2.4 million compared to the same period in 2009. Marketing expense for the year ended December 31, 2010 included \$246,000 of direct marketing and advertising expense and \$2.2 million in business development expense compared to \$444,000 and \$1.7 million, respectively, in 2009. Marketing expense for the year ended December 31, 2010 also included \$3.0 million for the purchase of miles related to the American Airlines AAdvantage® program compared to \$926,000 during 2009. Marketing may increase as we seek to further develop our brand, reach more of our target customers and expand in our target markets.

Communications and technology expense increased \$2.0 million to \$8.5 million during the year ended December 31, 2010 as a result of general business and customer growth.

FDIC insurance assessment expense increased by \$738,000 from \$8.5 million in 2009 to \$9.2 million due to higher rates and an increase in our deposit base.

Analysis of Financial Condition

Loans

Our total loans have grown at an annual rate of 14%, 15% and 30% in 2009, 2010 and 2011, respectively, reflecting the build-up of our lending operations. Our business plan focuses primarily on lending to middle market businesses and successful professionals and entrepreneurs, and as such, commercial and real estate loans have comprised a majority of our loan portfolio since we commenced operations, comprising 66% of total loans at December 31, 2011. Construction loans have decreased from 16% of the portfolio at December 31, 2007 to 6% of the portfolio at December 31, 2011. Consumer loans generally have represented 1% or less of the portfolio from December 31, 2007 to December 31, 2011. Loans held for sale, which relates to our mortgage warehouse lending operations where we invest in mortgage loan participations that are typically sold within 10 to 20 days. Volumes fluctuate based on the level of market demand in the product and the number of days between purchase and sale of the participated loans. If, due to market conditions, loans are not sold within the normal timeframe they may be transferred to the loans held for investment portfolio at a lower of cost or fair value. The loans are then subject to normal loan review, grading and reserve allocation requirements.

We originate the substantial majority of the loans held for investment in our portfolio. We also participate in syndicated loan relationships, both as a participant and as an agent. As of December 31, 2011, we have \$946.1 million in syndicated loans, \$253.4 million of which we acted as agent. All syndicated loans, whether we act as agent or participant, are underwritten to the same standards as all other loans originated by us. In addition, as of December 31, 2011, \$20.0 million of our syndicated loans were nonperforming, and none are considered potential problem loans.

The following summarizes our loans on a gross basis by major category as of the dates indicated (in thousands):

	2011	2010	December 31 2009	2008	2007
Commercial	\$3,275,150	\$2,592,924	\$2,457,533	\$2,276,054	\$2,035,049
Construction	422,026	270,008	669,426	667,437	573,459
Real estate	1,819,251	1,759,758	1,233,701	988,784	773,970
Consumer	24,822	21,470	25,065	32,671	28,334
Equipment leases	61,792	95,607	99,129	86,937	74,523
Loans held for sale	2,080,081	1,194,209	693,504	496,351	174,166
Total	\$7,683,122	\$5,933,976	\$5,178,358	\$4,548,234	\$3,659,501

Commercial Loans and Leases. Our commercial loan portfolio is comprised of lines of credit for working capital and term loans and leases to finance equipment and other business assets. Our energy production loans are generally collateralized with proven reserves based on appropriate valuation standards. Our commercial loans and leases are underwritten after carefully evaluating and understanding the borrower's ability to operate profitably. Our underwriting standards are designed to promote relationship banking rather than making loans on a transaction basis. Our lines of credit typically are limited to a percentage of the value of the assets securing the line. Lines of credit and term loans typically are reviewed annually and are supported by accounts receivable, inventory, equipment and other assets of our clients' businesses. At December 31, 2011, funded commercial loans and leases totaled approximately \$3.3 billion, approximately 43% of our total funded loans.

Real Estate Loans. Approximately 21% of our real estate loan portfolio (excluding construction loans) and 5% of the total portfolio is comprised of loans secured by properties other than market risk or investment-type real estate. Market risk loans are real estate loans where the primary source of repayment is expected to come from the sale or lease of the real property collateral. We generally provide temporary financing for commercial and residential property. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Our real estate loans generally have maximum terms of five to seven years, and we provide loans with both floating and fixed rates. We generally avoid long-term loans for commercial real estate held for investment. Real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. Appraised values may be highly variable due to market conditions and impact of the inability of potential purchasers and lessees to obtain financing and lack of transactions at comparable values. At December 31, 2011, real estate term loans totaled approximately \$1.8 billion, or 24% of our total funded loans; of this total, \$1,593.1 million were loans with floating rates and \$226.2 million were loans with fixed rates.

Construction Loans. Our construction loan portfolio consists primarily of single- and multi-family residential properties and commercial projects used in manufacturing, warehousing, service or retail businesses. Our construction loans generally have terms of one to three years. We typically make construction loans to developers, builders and contractors that have an established record of successful project completion and loan repayment and have a substantial investment in the borrowers' equity. However, construction loans are generally based upon estimates of costs and value associated with the completed project. Sources of repayment for these types of loans may be pre-committed permanent loans from other lenders, sales of developed property, or an interim loan commitment from us until permanent financing is obtained. The nature of these loans makes ultimate repayment extremely sensitive to overall economic conditions. Borrowers may not be able to correct conditions of default in loans, increasing risk of exposure to classification, NPA status, reserve allocation and actual credit loss and foreclosure. These loans typically have floating rates and commitment fees. At December 31, 2011, funded construction real estate loans totaled approximately \$422.0 million, approximately 6% of our total funded loans.

Loans Held for Sale. Our loans held for sale consist of participations purchased in single-family residential mortgages funded through our warehouse lending group. These loans are typically on our balance sheet for 10 to 20 days or less. We have agreements with mortgage lenders and participate in individual loans they originate. All loans are underwritten consistent with established programs for permanent financing with financially sound investors. Substantially all loans are conforming loans. At December 31, 2011, loans held for sale totaled approximately \$2.1 billion, approximately 27% of our total funded loans.

Letters of Credit. We issue standby and commercial letters of credit, and can service the international needs of our clients through correspondent banks. At December 31, 2011, our commitments under letters of credit totaled approximately \$71.4 million.

Portfolio Geographic and Industry Concentrations

We continue to lend primarily in Texas. As of December 31, 2011, a substantial majority of the principal amount of the loans held for investment in our portfolio was to businesses and individuals in Texas. This geographic concentration subjects the loan portfolio to the general economic conditions in Texas. The table below summarizes the industry concentrations of our funded loans at December 31, 2011. The risks created by these concentrations have been considered by management in the determination of the adequacy of the

allowance for loan losses. Management believes the allowance for loan losses is appropriate to cover estimated losses on loans at each balance sheet date.

(in thousands)	Amount	Percent of Total Loans
Services	\$2,425,324	31.5%
Loans held for sale	2,080,081	27.1%
Investors and investment management companies	845,958	11.0%
Petrochemical and mining	783,913	10.2%
Contracting — construction and real estate development	653,023	8.5%
Manufacturing	261,098	3.4%
Personal/household	180,688	2.4%
Wholesale	182,605	2.4%
Retail	163,970	2.1%
Contracting — trades	62,414	0.8%
Government	28,499	0.4%
Agriculture	15,549	0.2%
Total	\$7,683,122	100.0%

Our largest concentration in any single industry is in services. Loans extended to borrowers within the services industries include loans to finance working capital and equipment, as well as loans to finance investment and owner-occupied real estate. Significant trade categories represented within the services industries include, but are not limited to, real estate services, financial services, leasing companies, transportation and communication, and hospitality services. Borrowers represented within the real estate services category are largely owners and managers of both residential and non-residential commercial real estate properties. Personal/household loans include loans to certain successful professionals and entrepreneurs for commercial purposes, in addition to consumer loans. Loans held for sale are those loans originated by our mortgage warehouse lending group. Loans extended to borrowers within the contracting industry are comprised largely of loans to land developers and to both heavy construction and general commercial contractors. Many of these loans are secured by real estate properties, the development of which is or may be financed by our bank. Loans extended to borrowers within the petrochemical and mining industries are predominantly loans to finance the exploration and production of petroleum and natural gas. These loans are generally secured by proven petroleum and natural gas reserves.

We make loans that are appropriately collateralized under our credit standards. Approximately 97% of our funded loans are secured by collateral. Over 90% of the real estate collateral is located in Texas. The table below sets forth information regarding the distribution of our funded loans among various types of collateral at December 31, 2011 (in thousands except percentage data):

Collateral type:	Amount	Percent of Total Loans
Real property	\$2,241,277	29.1%
Business assets	2,128,599	27.7%
Participations in loans held for sale	2,080,081	27.1%
Energy	629,012	8.2%
Unsecured	212,696	2.8%
Other assets	146,456	1.9%
Highly liquid assets	181,799	2.4%
Rolling stock	33,083	0.4%
U. S. Government guaranty	30,119	0.4%
Total	\$7,683,122	100.0%

As noted in the table above, 29.1% of our loans are secured by real estate. The table below summarizes our real estate loan portfolio as segregated by the type of property securing the credit. Property type concentrations are stated as a percentage of year-end total real estate loans as of December 31, 2011 (in thousands except percentage data):

	Amount	Percent of Total Real Estate Loans
Property type:		
Market risk		
Commercial buildings	\$ 652,006	29.1%
Unimproved land	133,087	5.9%
Apartment buildings	215,456	9.6%

The table below summarizes our market risk real estate portfolio as segregated by the geographic region in which the property is located (in thousands except percentage data):

	Amount	Percent of Total
Geographic region:		
Dallas/Fort Worth	\$ 683,426	37.3%
Houston	400,250	21.8%
Austin	230,007	12.6%
San Antonio	241,302	13.2%
Other Texas cities	150,475	8.2%
Other states	126,991	6.9%
Total market risk real estate loans	\$1,832,451	100.0%

We extend market risk real estate loans, including both construction/development financing and limited term financing, to professional real estate developers and owners/managers of commercial real estate projects and properties who have a demonstrated record of past success with similar properties. Collateral properties include office buildings, warehouse/distribution buildings, shopping centers, apartment buildings, residential and commercial tract development located primarily within our five major metropolitan markets in Texas. As such loans are generally repaid through the borrowers' sale or lease of the properties, loan amounts are determined in part from an analysis of pro forma cash flows. Loans are also underwritten to comply with product-type specific advance rates against both cost and market value. We engage a variety of professional firms to supply appraisals, market study and feasibility reports, environmental assessments and project site inspections to complement our internal resources to best underwrite and monitor these credit exposures.

The determination of collateral value is critically important when financing real estate. As a result, obtaining current and objectively prepared appraisals is a major part of our underwriting and monitoring processes. Generally, our policy requires a new appraisal every three years. However, in the current economic downturn where real estate values have been fluctuating rapidly, more current appraisals are obtained when warranted by conditions such as a borrower's deteriorating financial condition, their possible inability to perform on the loan, and the increased risks involved with reliance on the collateral value as sole repayment of the loan. Generally, loans graded substandard or worse where real estate is a material portion of the collateral value and/or the income from the real estate or sale of the real estate is the primary source of debt service, annual appraisals are obtained. In all cases, appraisals are reviewed by a third party to determine reasonableness of the appraised value. The third party reviewer will challenge whether or not the data used is appropriate and relevant, form an opinion as to the appropriateness of the appraisal methods and techniques used, and determine if overall the analysis and conclusions of the appraiser can be relied upon. Additionally, the third party reviewer provides a detailed report of that analysis. Further review is conducted by our credit officers, as well as by the Bank's managed asset committee. These additional steps of review ensure that the underlying appraisal and the third party analysis can be relied upon. If we have differences, we will address those with the reviewer and determine the best method to resolve any differences. Both the appraisal process and the appraisal review process have been difficult in the current economic environment with the lack of comparable sales which is partially as a result of the lack of available financing which has ultimately led to overall depressed real estate values.

Large Credit Relationships

The market areas we serve primarily include the five major metropolitan markets of Texas, including Austin, Dallas, Fort Worth, Houston and San Antonio. As a result, we originate and maintain large credit relationships with numerous customers in the ordinary course of business. The legal limit of our bank is approximately \$111 million and our house limit is generally \$20 million or less. Larger hold positions will be accepted occasionally for exceptionally strong borrowers and otherwise where business opportunity and perceived credit risk warrant a somewhat larger investment. We consider large credit relationships to be those with commitments equal to or in excess of \$10.0 million. The following table provides additional information on our large credit relationships outstanding at year-end (in thousands):

	Number of Relationships	2011		Number of Relationships	2010	
		Period-End Balances			Period-End Balances	
		Committed	Outstanding		Committed	Outstanding
\$20.0 million and greater	39	\$ 943,137	\$ 683,371	25	\$ 598,299	\$ 446,093
\$10.0 million to \$19.9 million	159	2,212,434	1,593,248	122	2,242,013	1,687,786

Growth in period end outstanding balances related to large credit relationships primarily resulted from an increase in number of commitments. The following table summarizes the average per relationship committed and average outstanding loan balance related to our large credit relationships at year-end (in thousands):

	Number of Relationships	2011		Number of Relationships	2010	
		Average Balance			Average Balance	
		Committed	Outstanding		Committed	Outstanding
\$20.0 million and greater	39	\$24,183	\$17,522	25	\$23,932	\$17,844
\$10.0 million to \$19.9 million	159	13,915	10,020	122	18,377	13,834

Loan Maturity and Interest Rate Sensitivity on December 31, 2011

Total loans held for investment	\$5,603,041	\$2,171,116	\$3,003,512	\$428,413

Interest Reserve Loans

As of December 31, 2011, we had \$159.9 million in loans with interest reserves, which represents approximately 38% of our construction loans. Loans with interest reserves are common when originating construction loans, but the use of interest reserves is carefully controlled by our underwriting standards. The use of interest reserves is based on the feasibility of the project, the creditworthiness of the borrower and guarantors, and the loan to value coverage of the collateral. The interest reserve account allows the borrower, when financial conditions precedents are met to draw loan funds to pay interest charges on the outstanding balance of the loan. When drawn, the interest is capitalized and added to the loan balance, subject to conditions specified at the time the credit is approved and during the initial underwriting. We have effective and ongoing controls for monitoring compliance with loan covenants for advancing funds and determination of default conditions. When lending relationships involve financing of land on which improvements will be constructed, construction funds are not advanced until borrower has received lease or purchase commitments which will meet cash flow coverage requirements. We maintain current financial statements on the borrowing entity and guarantors, as well as periodic inspections of the project and analysis of whether the project is on schedule or delayed. Updated appraisals are ordered when necessary to validate the collateral values to support all advances, including reserve interest. Advances of interest reserves are discontinued if collateral values do not support the advances or if the borrower does not comply with other terms and conditions in the loan agreements. In addition, most of our construction lending is performed in Texas and our lenders are very familiar with trends in local real estate. At a point where we believe that our collateral position is jeopardized, we retain the right to stop the use of the interest reserves. As of December 31, 2011, \$17.3 million of our loans with interest reserves were on nonaccrual.

Non-performing Assets

Non-performing assets include non-accrual loans and leases and repossessed assets. The table below summarizes our non-accrual loans by type (in thousands):

	As of December 31		
	2011	2010	2009
Non-accrual loans(1)			
Commercial	\$12,913	\$ 42,543	\$ 34,021
Construction	21,119	21	20,023
Real estate	19,803	62,497	34,764
Consumer	313	706	273
Leases	432	6,323	6,544
Total non-accrual loans	54,580	112,090	95,625
Repossessed assets:			
OREO(3)	34,077	42,261	27,264
Other repossessed assets	1,516	451	162
Total other repossessed assets	35,593	42,712	27,426
Total non-performing assets	\$90,173	\$154,802	\$123,051
Restructured loans(4)	\$25,104	\$ 4,319	\$ —
Loans past due 90 days and accruing(2)	\$ 5,467	\$ 6,706	\$ 6,081

- (1) The accrual of interest on loans is discontinued when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, which is generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining unpaid principal amount of the loan is deemed to be fully collectible. If collectibility is questionable, then cash payments are applied to principal. If these loans had been current throughout their terms, interest and fees on loans would have increased by approximately \$5.9 million, \$10.5 million and \$3.6 million for the years ended December 31, 2011, 2010 and 2009, respectively.
- (2) At December 31, 2011, 2010 and 2009, loans past due 90 days and still accruing includes premium finance loans of \$2.5 million, \$3.3 million and \$2.4 million, respectively. These loans are generally secured by obligations of insurance carriers to refund premiums on cancelled insurance policies. The refund of premiums from the insurance carriers can take 180 days or longer from the cancellation date.
- (3) At December 31, 2011, 2010 and 2009, OREO balance is net of \$10.7 million, \$12.9 million and \$6.6 million valuation allowance, respectively.
- (4) As of December 31, 2011 and 2010, non-accrual loans included \$13.8 million and \$26.5 million, respectively, in loans that met the criteria for restructured. As of December 31, 2009, we did not have any loans that met the criteria for restructured.

Total nonperforming assets at December 31, 2011 decreased \$64.6 million from December 31, 2010, compared to a \$31.8 million increase from December 31, 2009 to December 31, 2010. We experienced decreases in levels of nonperforming assets in 2011 and an overall improvement in credit quality. As a result, our reserve for loan losses as a percent of loans, as well as provision for credit losses, decreased. The increase in the prior year was reflective of the overall economic deterioration during 2010. As a result our reserve for loans losses as a percentage of loans, as well as our provision for credit losses recorded in 2010 increased over levels experienced prior to 2009.

The table below summarizes the non-accrual loans as segregated by loan type and type of property securing the credit as of December 31, 2011 (in thousands):

Non-accrual loans:	
Commercial	
Lines of credit secured by the following:	
Various single family residences and notes receivable	\$ 6,134
Assets of the borrowers	4,815
Other	1,964
<hr/>	
Total commercial	12,913
Real estate	
Secured by:	
Commercial property	4,877
Unimproved land and/or developed residential lots	5,374
Rental properties and multi-family residential real estate	905
Single family residences	5,224
Other	3,423
<hr/>	
Total real estate	19,803
Construction	
Secured by:	
Unimproved land and/or developed residential lots	21,119
Consumer	313
Leases (commercial leases primarily secured by assets of the lessor)	432
<hr/>	
Total non-accrual loans	\$54,580

Reserves on impaired loans were \$5.3 million at December 31, 2011, compared to \$14.7 million at December 31, 2010 and \$18.4 million at December 31, 2009. We recognized \$2.2 million in interest income on non-accrual loans during 2011 compared to \$566,000 in 2010 and \$25,000 in 2009. Additional interest income that would have been recorded if the loans had been current during the years ended December 31, 2011, 2010 and 2009 totaled \$5.9 million, \$10.5 million and \$3.6 million, respectively. Average impaired loans outstanding during the years ended December 31, 2011, 2010 and 2009 totaled \$71.0 million, \$120.6 million and \$62.3 million, respectively.

Generally, we place loans on non-accrual when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, which is generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining unpaid principal amount of the loan is deemed to be fully collectible. If collectibility is questionable, then cash payments are applied to principal. As of December 31, 2011, \$19.2 million of our non-accrual loans were earning on a cash basis. A loan is placed back on accrual status when both principal and interest are current and it is probable that we will be able to collect all amounts due (both principal and interest) according to the terms of the loan agreement.

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due (both principal and interest) according to the terms of the original loan agreement. Reserves on impaired loans are measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate or the fair value of the underlying collateral.

At December 31, 2011, we had \$5.5 million in loans past due 90 days and still accruing interest. Of this total, \$2.3 million are loans guaranteed as to both interest and principal by the USDA. In addition, \$2.5

million are premium finance loans. These loans are primarily secured by obligations of insurance carriers to refund premiums on cancelled insurance policies. The refund of premiums from the insurance carriers can take 180 days or longer from the cancellation date.

Restructured loans are loans on which, due to the borrower's financial difficulties, we have granted a concession that we would not otherwise consider. This may include a transfer of real estate or other assets from the borrower, a modification of loan terms, or a combination of the two. Modifications of terms that could potentially qualify as a restructuring include reduction of contractual interest rate, extension of the maturity date at a contractual interest rate lower than the current rate for new debt with similar risk, or a reduction of the face amount of debt, either forgiveness of principal or accrued interest. As of December 31, 2011 we have \$25.1 million in loans considered restructured that are not already on nonaccrual. Of the nonaccrual loans at December 31, 2011, \$13.8 million met the criteria for restructured. A loan continues to qualify as restructured until a consistent payment history has been evidenced, generally no less than twelve months. Assuming that the restructuring agreement specifies an interest rate at the time of the restructuring that is greater than or equal to the rate that we are willing to accept for a new extension of credit with comparable risk, then the loan no longer has to be considered a restructuring if it is in compliance with modified terms in calendar years after the year of the restructuring.

Potential problem loans consist of loans that are performing in accordance with contractual terms, but for which we have concerns about the borrower's ability to comply with repayment terms because of the borrower's potential financial difficulties. We monitor these loans closely and review their performance on a regular basis. At December 31, 2011 and 2010, we had \$18.2 million and \$25.3 million, respectively, in loans of this type which were not included in either non-accrual or 90 days past due categories.

The table below presents a summary of the activity related to OREO (in thousands):

	Year ended December 31		
	2011	2010	2009
Beginning balance	\$ 42,261	\$27,264	\$ 25,904
Additions	22,180	29,559	23,466
Sales	(23,566)	(6,058)	(14,265)
Valuation allowance for OREO	(3,922)	(6,587)	(6,619)
Direct write-downs	(2,876)	(1,917)	(1,222)
Ending balance	\$ 34,077	\$42,261	\$ 27,264

The following table summarizes the assets held in OREO at December 31, 2011 (in thousands):

OREO:		
Unimproved commercial real estate lots and land		\$ 4,867
Commercial buildings		9,385
Undeveloped land and residential lots		15,638
Multifamily lots and land		801
Other		3,386
Total OREO		\$34,077

When foreclosure occurs, fair value, which is generally based on appraised values, may result in partial charge-off of a loan upon taking property, and so long as property is retained, reductions in appraised values will result in valuation adjustment taken as non-interest expense. In addition, if the decline in value is

believed to be permanent and not just driven by market conditions, a direct write-down to the OREO balance may be taken. We generally pursue sales of OREO when conditions warrant, but we may choose to hold certain properties for a longer term, which can result in additional exposure related to the appraised values during that holding period. During the year ended December 31, 2011, we recorded \$6.8 million in valuation expense. Of the \$6.8 million, \$3.9 million related to increases to the valuation allowance, and \$2.9 million related to direct write-downs.

Summary of Loan Loss Experience

The provision for loan losses is a charge to earnings to maintain the reserve for loan losses at a level consistent with management's assessment of the collectability of the loan portfolio in light of current economic conditions and market trends. We recorded a provision for credit losses of \$28.5 million for the year ended December 31, 2011, \$53.5 million for the year ended December 31, 2010, and \$43.5 million for the year ended December 31, 2009. The amount of reserves and provision required to support the reserve generally increased in 2009 and 2010 as a result of credit deterioration in our loan portfolio driven by negative changes in national and regional economic conditions and the impact of those conditions on the financial condition of borrowers and the values of assets, including real estate assets, pledged as collateral. However, in 2011 we have experienced improvements in credit quality, which has resulted in decreases in the levels of reserves and provision. We expect to see some continued improvement in credit quality in 2012.

The reserve for loan losses is comprised of specific reserves for impaired loans and an estimate of losses inherent in the portfolio at the balance sheet date, but not yet identified with specified loans. We regularly evaluate our reserve for loan losses to maintain an appropriate level to absorb estimated loan losses inherent in the loan portfolio. Factors contributing to the determination of reserves include the credit worthiness of the borrower, changes in the value of pledged collateral, and general economic conditions. All loan commitments rated substandard or worse and greater than \$500,000 are specifically reviewed for loss potential. For loans deemed to be impaired, a specific allocation is assigned based on the losses expected to be realized from those loans. For purposes of determining the general reserve, the portfolio is segregated by product types to recognize differing risk profiles among categories, and then further segregated by credit grades. Credit grades are assigned to all loans. Each credit grade is assigned a risk factor, or reserve allocation percentage. These risk factors are multiplied by the outstanding principal balance and risk-weighted by product type to calculate the required reserve. A similar process is employed to calculate a reserve assigned to off-balance sheet commitments, specifically unfunded loan commitments and letters of credit. Even though portions of the allowance may be allocated to specific loans, the entire allowance is available for any credit that, in management's judgment, should be charged off.

The reserve allocation percentages assigned to each credit grade have been developed based primarily on an analysis of our historical loss rates. The allocations are adjusted for certain qualitative factors for such things as general economic conditions, changes in credit policies and lending standards. Changes in the trend and severity of problem loans can cause the estimation of losses to differ from past experience. In addition, the reserve considers the results of reviews performed by independent third party reviewers as reflected in their confirmations of assigned credit grades within the portfolio. The portion of the allowance that is not derived by the allowance allocation percentages compensates for the uncertainty and complexity in estimating loan and lease losses including factors and conditions that may not be fully reflected in the determination and application of the allowance allocation percentages. We evaluate many factors and conditions in determining the unallocated portion of the allowance, including the economic and business conditions affecting key lending areas, credit quality trends and general growth in the portfolio. The allowance is considered appropriate, given management's assessment of potential losses within the portfolio as of the evaluation date, the significant growth in the loan and lease portfolio, current economic conditions in the Company's market areas and other factors.

The methodology used in the periodic review of reserve adequacy, which is performed at least quarterly, is designed to be dynamic and responsive to changes in portfolio credit quality. The changes are reflected in

the general reserve and in specific reserves as the collectability of larger classified loans is evaluated with new information. As our portfolio has matured, historical loss ratios have been closely monitored, and our reserve adequacy relies primarily on our loss history. The review of reserve adequacy is performed by executive management and presented to our board of directors for their review, consideration and ratification on a quarterly basis.

The reserve for credit losses, which includes a liability for losses on unfunded commitments, totaled \$72.8 million at December 31, 2011, \$73.4 million at December 31, 2010 and \$70.9 million at December 31, 2009. The total reserve percentage decreased to 1.31% at year-end 2011 from 1.56% and 1.59% of loans held for investment at December 31, 2010 and 2009, respectively. The total reserve percentage had increased in 2009 and 2010 as a result of the effects of national and regional economic conditions on borrowers and values of assets pledged as collateral. The combined reserve is starting to trend down as we recognize losses on loans for which there were specific or general allocations of reserves and see improvement in our overall credit quality. The overall reserve for loan losses continued to result from consistent application of the loan loss reserve methodology as described above. At December 31, 2011, we believe the reserve is sufficient to cover all expected losses in the portfolio and has been derived from consistent application of the methodology described above. Should any of the factors considered by management in evaluating the adequacy of the allowance for loan losses change, our estimate of expected losses in the portfolio could also change, which would affect the level of future provisions for loan losses.

The table below presents a summary of our loan loss experience for the past five years (in thousands except percentage and multiple data):

	2011	Year Ended December 31			2007
	2011	2010	2009	2008	2007

Loans past due 90 days and still accruing ⁽³⁾	\$ 5,467	\$ 6,706	\$ 6,081	\$ 4,115	\$ 4,147
Reserve as a percent of non-performing loans	1.3x	.6x	.7x	1.0x	1.5x

- (1) The accrual of interest on loans is discontinued when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, which is generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining unpaid principal amount of the loan is deemed to be fully collectible. If collectibility is questionable, then cash payments are applied to principal. If these loans had been current throughout their terms, interest and fees on loans would have increased by approximately \$5.9 million, \$10.5 million and \$3.6 million for the years ended December 31, 2011, 2010 and 2009, respectively.
- (2) Excludes loans held for sale.
- (3) At December 31, 2011, 2010 and 2009, loans past due 90 days and still accruing includes premium finance loans of \$2.5 million, \$3.3 million and \$2.4 million, respectively. These loans are generally secured by obligations of insurance carriers to refund premiums on cancelled insurance policies. The refund of premiums from the insurance carriers can take 180 days or longer from the cancellation date.
- (4) At December 31, 2011, 2010 and 2009, OREO balance is net of \$10.7 million, \$12.9 million and \$6.6 million valuation allowance, respectively.
- (5) As of December 31, 2011 and 2010, non-accrual loans included \$13.8 million and \$26.5 million, respectively, in loans that met the criteria for restructured. As of December 31, 2009, we did not have any loans that met the criteria for restructured.

Loan Loss Reserve Allocation

<i>(in thousands except percentage data)</i>	December 31									
	2011		2010		2009		2008		2007	
	Reserve	% of Loans(1)								
Loan category:										
Commercial	\$17,337	59%	\$15,918	55%	\$33,269	55%	\$23,348	56%	\$16,466	58%

Unallocated	8,813	—	4,496	—	4,596	—	1,051	—	2,740	—
Total	\$70,295	100%	\$71,510	100%	\$67,931	100%	\$45,365	100%	\$31,686	100%

- (1) Excludes loans held for sale.

During 2011, the reserve allocated to all categories of loans decreased compared to 2010 primarily due to decreases in the level of allocations required by our loan loss reserve methodology as the level of nonperforming loans decreased. The percentage of the reserve allocated to commercial and construction loans increased in the current year compared to 2010, consistent with the increases in commercial and construction portfolios during 2011. The percentage of the reserve allocated to real estate decreased in the current year compared to 2010, consistent with the decrease in the real estate non-accruals, offset by a slight increase in the real estate portfolio. We have traditionally maintained an unallocated reserve component to allow for uncertainty in economic and other conditions affecting the quality of the loan portfolio. The unallocated portion of our loan loss reserve has increased since December 31, 2010. We believe the level of unallocated reserves at December 31, 2011 is warranted due to the ongoing weak economic environment which has produced more frequent losses, including those resulting from fraud by borrowers. Our methodology used to calculate the allowance considers historical losses, however, the historical loss rates for specific product types or credit risk grades may not fully incorporate the effects of continued weakness in the economy. In addition, a substantial portion of losses realized over the past several years related to commercial real estate loans. Continuing uncertainty and illiquidity in the

commercial real estate market has produced and continues to cause material changes in appraised values that can influence our impairment calculations on currently impaired loans and on pass-rated loans that may experience weakness if economic conditions and valuations do not stabilize.

Securities Portfolio

Securities are identified as either held-to-maturity or available-for-sale based upon various factors, including asset/liability management strategies, liquidity and profitability objectives, and regulatory requirements. Held-to-maturity securities are carried at cost, adjusted for amortization of premiums or accretion of discounts. Available-for-sale securities are securities that may be sold prior to maturity based upon asset/liability management decisions. Securities identified as available-for-sale are carried at fair value. Unrealized gains or losses on available-for-sale securities are recorded as accumulated other comprehensive income (loss) in stockholders' equity, net of taxes. Amortization of premiums or accretion of discounts on mortgage-backed securities is periodically adjusted for estimated prepayments.

During the year ended December 31, 2011, we maintained an average securities portfolio of \$157.1 million compared to an average portfolio of \$222.7 million for the same period in 2010 and \$314.8 million for the same period in 2009. At December 31, 2011 and 2010, the portfolios were primarily comprised of mortgage-backed securities. Of the mortgage-backed securities, substantially all are guaranteed by U.S. government agencies. Our portfolio included no impaired securities during 2011 and 2010.

Our net unrealized gain on the securities portfolio value decreased due to the reduction in balances held from a net gain of \$8.2 million, which represented 4.65% of the amortized cost, at December 31, 2010, to a net gain of \$7.3 million, which represented 5.32% of the amortized cost, at December 31, 2011. During 2010, the unrealized gain on the securities portfolio value decreased, also as a result of the reduced balances held, from a net gain of \$9.5 million, which represented 3.70% of the amortized cost, at December 31, 2009, to a net gain of \$8.2 million, which represented 4.65% of the amortized cost, at December 31, 2010. Changes in value reflect changes in market interest rates and the total balance of securities.

The average expected life of the mortgage-backed securities was 1.7 years at December 31, 2011 and 2.0 years at December 31, 2010. The effect of possible changes in interest rates on our earnings and equity is discussed under "Interest Rate Risk Management."

The following presents the amortized cost and fair values of the securities portfolio at December 31, 2011, 2010 and 2009 (in thousands):

	At December 31					
	2011		2010		2009	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Available-for-sale:

Total available-for-sale securities:					
Amortized cost					<u>\$136,446</u>
Estimated fair value					<u>\$143,710</u>

(1) Actual maturities may differ significantly from contractual maturities because borrowers may have the right to call or prepay obligations with or without prepayment penalties. The average expected life of the mortgage-backed securities was 1.7 years at December 31, 2011.

(2) Yields have been adjusted to a tax equivalent basis assuming a 35% federal tax rate.

(3) Yields are calculated based on amortized cost.

The fair value of investment securities is based on prices obtained from independent pricing services which are based on quoted market prices for the same or similar securities. We have obtained documentation from the primary pricing service we use about their processes and controls over pricing. In addition, on a quarterly basis we independently verify the prices that we receive from the service provider using two additional independent pricing sources. Any significant differences are investigated and resolved.

At December 31, 2011, we did not have any investment securities in an unrealized loss position. The following table discloses, as of December 31, 2010, our investment securities that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 or more months (in thousands):

	Less Than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Mortgage-backed securities	\$3,681	\$(5)	\$—	\$—	\$3,681	\$(5)

At December 31, 2010, the number of investment positions in an unrealized loss position totaled 1. The unrealized losses at December 31, 2010 were interest rate related, and losses have decreased as rates decreased in 2009 and remained low during 2010 and 2011. We do not believe these unrealized losses are “other than temporary” as (1) we do not have the intent to sell any of the securities in the table above; and (2) it is not probable that we will be unable to collect the amounts contractually due. We have not identified any issues related to the ultimate repayment of principal as a result of credit concerns on these securities.

Deposits

We compete for deposits by offering a broad range of products and services to our customers. While this includes offering competitive interest rates and fees, the primary means of competing for deposits is convenience and service to our customers. However, our strategy to provide service and convenience to customers does not include a large branch network. Our bank offers nine banking centers, courier services and online banking. BankDirect, the Internet division of our bank, serves its customers on a 24 hours-a-day/7 days-a-week basis solely through Internet banking.

Average deposits for the year ended December 31, 2011 increased \$350.2 million compared to the same period of 2010. Average demand deposits and savings deposits increased by \$398.8 million and \$259.5 million, respectively, while interest bearing transaction deposits and time deposits (including deposits in foreign branches) decreased \$46.6 million and \$261.4 million during the year ended December 31, 2011 as compared to the same period of 2010. The average cost of deposits decreased in 2011 mainly due to our focused effort to reduce rates paid on deposits.

Average deposits for the year ended December 31, 2010 increased \$1.3 billion compared to the same period of 2009. Average demand deposits, interest bearing transaction and savings increased by \$355.5 million, \$289.7 million and \$960.1 million, respectively, while time deposits (including deposits in foreign branches) decreased \$285.3 million during the year ended December 31, 2010 as compared to the same period of 2009. The average cost of deposits decreased in 2010 mainly due to decreasing market interest rates during 2010, as well as our focused effort to reduce rates paid on deposits.

The following table discloses our average deposits for the years ended December 31, 2011, 2010 and 2009 (in thousands):

	Average Balances		
	2011	2010	2009
Non-interest bearing	\$1,515,021	\$1,116,260	\$ 760,776
Interest bearing transaction	391,100	437,674	147,961
Savings	2,401,997	2,142,541	1,182,441
Time deposits	562,654	913,616	1,188,964
Deposits in foreign branches	490,703	401,155	411,116
Total average deposits	\$5,361,475	\$5,011,246	\$3,691,258

As with our loan portfolio, most of our deposits are from businesses and individuals in Texas, particularly the Dallas metropolitan area. As of December 31, 2011, approximately 75% of our deposits originated out of our Dallas metropolitan banking centers. Uninsured deposits at December 31, 2011 were 43% of total

deposits, compared to 50% of total deposits at December 31, 2010 and 55% of total deposits at December 31, 2009. The presentation for 2011, 2010 and 2009 does reflect combined ownership, but does not reflect all of the account styling that would determine insurance based on FDIC regulations.

At December 31, 2011, we had \$478.0 million in interest bearing time deposits of \$100,000 or more in foreign branches related to our Cayman Islands branch.

Maturity of Domestic CDs and Other Time Deposits in Amounts of \$100,000 or More

<i>(In thousands)</i>	2011	December 31 2010	2009
Months to maturity:			
3 or less	\$302,319	\$406,616	\$632,763
Over 3 through 6	95,474	179,438	132,865
Over 6 through 12	118,649	153,173	120,561
Over 12	34,887	43,197	26,541
Total	\$551,329	\$782,424	\$912,730

Liquidity and Capital Resources

In general terms, liquidity is a measurement of our ability to meet our cash needs. Our objective in managing our liquidity is to maintain our ability to meet loan commitments, purchase securities or repay deposits and other liabilities in accordance with their terms, without an adverse impact on our current or future earnings. Our liquidity strategy is guided by policies, which are formulated and monitored by our senior management and our Balance Sheet Management Committee (“BSMC”), and which take into account the marketability of assets, the sources and stability of funding and the level of unfunded commitments. We regularly evaluate all of our various funding sources with an emphasis on accessibility, stability, reliability and cost-effectiveness. For the years ended December 31, 2011 and 2010, our principal source of funding has been our customer deposits, supplemented by short-term borrowings primarily from federal funds purchased and Federal Home Loan Bank (“FHLB”) borrowings.

Our liquidity needs have typically been fulfilled through growth in our core customer deposits and supplemented with brokered deposits and borrowings as needed. Our goal is to obtain as much of our funding for loans held for investment and other earnings assets as possible from deposits of these core customers. These deposits are generated principally through development of long-term relationships with customers and stockholders and our retail network, which is mainly through BankDirect. In addition to deposits from our core customers, we also have access to incremental deposits through brokered retail certificates of deposit, or CDs. These CDs are generally of short maturities, 30 to 90 days, and are used to supplement temporary differences in the growth in loans, including growth in specific categories of loans, compared to customer deposits. Due to the increase in loans held for sale during the fourth quarter of 2011, we issued brokered CDs with maturities of 30 days. The following tab summarizes our core customer deposits and brokered deposits (in millions):

	December 31 2011	December 31 2010
Deposits from core customers	\$5,391.1	\$5,455.4
Deposits from core customers as a percent of total deposits	97.0%	100.0%
Brokered deposits	\$ 165.1	\$ —
Brokered deposits as a percent of total deposits	3.0%	0.0%
Average deposits from core customers	\$5,344.2	\$4,982.6
Average deposits from core customers as a percent of average total deposits	99.7%	99.4%
Average brokered deposits	\$ 17.3	\$ 28.6
Average brokered deposits as a percent of average total deposits	0.3%	0.6%

We have access to sources of brokered deposits of not less than an additional \$3.3 billion. Based on the increase in brokered CDs, customer deposits (total deposits minus brokered CDs) at December 31, 2011 decreased \$64.3 million from December 31, 2010.

Additionally, we have borrowing sources available to supplement deposits and meet our funding needs. Such borrowings are generally used to fund our loans held for sale, due to their liquidity, short duration and interest spreads available. These borrowing sources include federal funds purchased from our downstream correspondent bank relationships (which consist of banks that are smaller than our bank) and from our upstream correspondent bank relationships (which consist of banks that are larger than our bank), customer repurchase agreements, treasury, tax and loan notes, and advances from the FHLB and the Federal Reserve. The following table summarizes our borrowings (in thousands):

	2011		2010		2009				
	Balance	Rate(4)	Maximum Outstanding at Any Month End	Balance	Rate(4)	Maximum Outstanding at Any Month End			
Federal funds purchased (5)	\$ 412,249	0.27%	\$	\$283,781	0.32%	\$	\$ 580,519	0.33%	\$
Customer repurchase agreements (1)	23,801	0.06%		10,920	0.05%		25,070	0.10%	
Treasury, tax and loan notes (2)	—	—		3,100	0.00%		5,940	0.00%	
FHLB borrowings (3)	1,200,066	0.14%		86	2.21%		325,000	0.11%	
Fed borrowings	132,000	0.75%		—	—		—	—	
TLGP borrowings	—	—		—	—		20,500	0.84%	
Trust preferred subordinated debentures	113,406	2.48%		113,406	2.23%		113,406	3.19%	
Total borrowings	\$1,881,522		\$1,986,324	\$411,293		\$653,665	\$1,070,435		\$1,753,181

- (1) Securities pledged for customer repurchase agreements were \$28.3 million, \$21.6 million and \$36.0 million at December 31, 2011, 2010 and 2009, respectively.
- (2) Securities pledged for treasury, tax and loan notes were \$5.7 million, \$7.4 million and \$11.3 million at December 31, 2011, 2010 and 2009, respectively.
- (3) FHLB borrowings are collateralized by a blanket floating lien based on real estate loans and also certain pledged securities. The weighted-average interest rate for the years ended December 31, 2011, 2010 and 2009 was 0.11%, 0.14% and 0.62%, respectively.
- (4) Interest rate as of period end.
- (5) The weighted-average interest rate on federal funds purchased for the years ended December 31, 2011, 2010 and 2009 was 0.25%, 0.44% and 0.47%, respectively.

The following table summarizes our other borrowing capacities in excess of balances outstanding (in thousands):

	2011	2010	2009
FHLB borrowing capacity relating to loans	\$ 4,524	\$869,089	\$738,682
FHLB borrowing capacity relating to securities	15,909	120,823	57,101
Total FHLB borrowing capacity	\$ 20,433	\$989,912	\$795,783
Unused federal funds lines available from commercial banks	\$390,720	\$482,460	\$736,560

From time to time, we borrow overnight funds from the Federal Reserve. During 2011, we did so on seven such occasions. Fed borrowings for the year ended December 31, 2011 averaged \$1.3 million.

In connection with the FDIC's Temporary Liability Guarantee Program ("TLGP"), we had the capacity to issue up to \$1.1 billion in indebtedness which will be guaranteed by the FDIC for a limited period of time to newly issued senior unsecured debt and non-interest bearing deposits. The notes were issued prior to October 31, 2009 and have maturities no later than December 31, 2012. As of December 31, 2010, all of these notes had matured compared to \$20.5 million outstanding at December 31, 2009.

From November 2002 to September 2006 various Texas Capital Statutory Trusts were created and subsequently issued fixed and/or floating rate Capital Securities in various private offerings totaling \$113.4 million. As of December 31, 2011, the details of the trust preferred subordinated debentures are summarized below (in thousands):

	Texas Capital Bancshares Statutory Trust I	Texas Capital Bancshares Statutory Trust II	Texas Capital Bancshares Statutory Trust III	Texas Capital Bancshares Statutory Trust IV	Texas Capital Bancshares Statutory Trust V
Date issued	November 19, 2002	April 10, 2003	October 6, 2005	April 28, 2006	September 29, 2006
Capital securities issued	\$10,310	\$10,310	\$25,774	\$25,774	\$41,238
Floating or fixed rate securities	Floating	Floating	Fixed/Floating(1)	Floating	Floating
Interest rate on subordinated debentures	3 month LIBOR + 3.35%	3 month LIBOR + 3.25%	3 month LIBOR + 1.51%	3 month LIBOR + 1.60%	3 month LIBOR + 1.71%
Maturity date	November 2032	April 2033	December 2035	June 2036	September 2036

- (1) Interest rate is a fixed rate of 6.19% for five years through December 15, 2010, and a floating rate of interest for the remaining 25 years that resets quarterly to 1.51% above the three-month LIBOR.

After deducting underwriter's compensation and other expenses of each offering, the net proceeds were available to the Company to increase capital and for general corporate purposes, including use in investment and lending activities. Interest payments on all subordinated debentures are deductible for federal income tax purposes. As of December 31, 2011, the weighted average quarterly rate on the subordinated debentures was 2.34%, compared to 2.27% average for all of 2011, and 3.24% for all of 2010.

Our equity capital averaged \$568.1 million for the year ended December 31, 2011 as compared to \$516.0 million in 2010 and \$473.8 million in 2009. We have not paid any cash dividends on our common stock since we commenced operations and have no plans to do so in the foreseeable future.

On January 16, 2009, we completed the issuance of \$75 million of perpetual preferred stock and related warrants under the U.S. Department of Treasury's voluntary Capital Purchase Program ("CPP" or "the Program"). The preferred stock was repurchased in May 2009. In connection with the repurchase, we recorded a \$3.9 million accelerated deemed dividend in the second quarter of 2009 representing the unamortized difference between the book value and the carrying value of the preferred stock repurchased from the Treasury. The \$3.9 million accelerated deemed dividend, combined with the previously scheduled preferred dividend of \$523,000 for the second quarter of 2009 and the preferred dividend of \$930,000 paid in the first quarter of 2009, resulted in a total dividend and reduction of earnings available to common stockholders of \$5.4 million for the year ended December 31, 2009. In the first quarter of 2010, the Treasury auctioned these warrants, and as of December 31, 2011, the warrants to purchase 758,086 shares at \$14.84 per share were still outstanding.

On May 8, 2009, we completed a sale of 4.6 million shares of our common stock in a public offering. The purchase price was \$13.75 per share, and net proceeds from the sale totaled \$59.4 million. The new capital is being used for general corporate purposes, including capital for support of anticipated growth of our bank.

On January 27, 2010, we entered into an Equity Distribution Agreement with Morgan Stanley & Co. Incorporated, pursuant to which we may, from time to time, offer and sell shares of our common stock, having aggregate gross sales proceeds of up to \$40,000,000. Sales of the shares were made by means of brokers' transactions on or through the NASDAQ Global Select Market at market prices prevailing at the time of the sale or as otherwise agreed to by us and Morgan Stanley. During the year ended December 31, 2010 we sold 734,835 shares at an average price of \$17.58. Net proceeds on the sales are approximately \$12.5 million, are being used for general corporate purposes. While the program remains in place, no sales under this program have been made since July 2010.

Our capital ratios remain above the levels required to be well capitalized and have been enhanced with the additional capital raised since 2009 through 2010 and will allow us to grow organically with the addition of loan and deposit relationships.

Our actual and minimum required capital amounts and actual ratios are as follows (in thousands, except percentage data):

	Regulatory Capital Adequacy			
	December 31, 2011		December 31, 2010	
	Amount	Ratio	Amount	Ratio
Total capital (to risk-weighted assets):

Commitments and Contractual Obligations

The following table presents, as of December 31, 2011, significant fixed and determinable contractual obligations to third parties by payment date. Payments for borrowings do not include interest. Payments related to leases are based on actual payments specified in the underlying contracts. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

<i>(In thousands)</i>	Note Reference	Within One Year	After One But Within Three Years	After Three But Within Five Years	After Five Years	Total
Deposits without a stated maturity(1)	7	\$4,489,478	\$ —	\$ —	\$ —	\$4,489,478
Time deposits(1)	7	1,026,174	30,435	9,401	769	1,066,779
Federal funds purchased(1)	8	412,249	—	—	—	412,249
Customer repurchase agreements(1)	8	23,801	—	—	—	23,801
FHLB borrowings(1)	8	1,200,000	—	66	—	1,200,066
Fed borrowings(1)	8	132,000	—	—	—	132,000
Operating lease obligations(1) (2)	16	9,435	17,506	15,677	38,578	81,196
Trust preferred subordinated debentures(1)	8, 9	—	—	—	113,406	113,406
Total contractual obligations(1)		\$7,293,137	\$47,941	\$25,144	\$152,753	\$7,518,975

(1) Excludes interest.

(2) Non-balance sheet item.

Off-Balance Sheet Arrangements

The contractual amount of our financial instruments with off-balance sheet risk expiring by period at December 31, 2011 is presented below (in thousands):

	Within One Year	After One But Within Three Years	After Three But Within Five Years	After Five Years	Total
Commitments to extend credit	\$770,078	\$682,053	\$268,980	\$9,690	\$1,730,801
Standby and commercial letters of credit	61,399	8,959	1,002	—	71,360
Total financial instruments with off-balance sheet risk	\$831,477	\$691,012	\$269,982	\$9,690	\$1,802,161

Due to the nature of our unfunded loan commitments, including unfunded lines of credit, the amounts presented in the table above do not necessarily represent amounts that we anticipate funding in the periods presented above.

Critical Accounting Policies

SEC guidance requires disclosure of “critical accounting policies.” The SEC defines “critical accounting policies” as those that are most important to the presentation of a company’s financial condition and results, and require management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

We follow financial accounting and reporting policies that are in accordance with accounting principles generally accepted in the United States. The more significant of these policies are summarized in Note 1 to

the consolidated financial statements. Not all these significant accounting policies require management to make difficult, subjective or complex judgments. However, the policy noted below could be deemed to meet the SEC's definition of critical accounting policies.

Management considers the policies related to the allowance for loan losses as the most critical to the financial statement presentation. The total allowance for loan losses includes activity related to allowances calculated in accordance with Accounting Standards Codification ("ASC") 310, *Receivables*, and ASC 450, *Contingencies*. The allowance for loan losses is established through a provision for loan losses charged to current earnings. The amount maintained in the allowance reflects management's continuing evaluation of the loan losses inherent in the loan portfolio. The allowance for loan losses is comprised of specific reserves assigned to certain classified loans and general reserves. Factors contributing to the determination of specific reserves include the credit-worthiness of the borrower, and more specifically, changes in the expected future receipt of principal and interest payments and/or in the value of pledged collateral. A reserve is recorded when the carrying amount of the loan exceeds the discounted estimated cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. For purposes of determining the general reserve, the portfolio is segregated by product types in order to recognize differing risk profiles among categories, and then further segregated by credit grades. See "Summary of Loan Loss Experience" and Note 3 – Loans in the accompanying notes to the consolidated financial statements included elsewhere in this report for further discussion of the risk factors considered by management in establishing the allowance for loan losses.

New Accounting Standards

See Note 24 – New Accounting Standards in the accompanying notes to consolidated financial statements included elsewhere in this report for details of recently issued accounting pronouncements and their expected impact on our financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Market risk is a broad term for the risk of economic loss due to adverse changes in the fair value of a financial instrument. These changes may be the result of various factors, including interest rates, foreign exchange rates, commodity prices, or equity prices. Additionally, the financial instruments subject to market risk can be classified either as held for trading purposes or held for other than trading.

We are subject to market risk primarily through the effect of changes in interest rates on our portfolio of assets held for purposes other than trading. The effect of other changes, such as foreign exchange rates, commodity prices, and/or equity prices do not pose significant market risk to us.

The responsibility for managing market risk rests with the Balance Sheet Management Committee, which operates under policy guidelines established by our board of directors. The negative acceptable variation in net interest revenue due to a 200 basis point increase or decrease in interest rates is generally limited by these guidelines to +/- 5%. These guidelines also establish maximum levels for short-term borrowings, short-term assets and public and brokered deposits. They also establish minimum levels for unpledged assets, among other things. Compliance with these guidelines is the ongoing responsibility of the BSMC, with exceptions reported to our board of directors on a quarterly basis.

Interest Rate Risk Management

Our interest rate sensitivity is illustrated in the following table. The table reflects rate-sensitive positions as of December 31, 2011, and is not necessarily indicative of positions on other dates. The balances of interest rate sensitive assets and liabilities are presented in the periods in which they next reprice to market rates or mature and are aggregated to show the interest rate sensitivity gap. The mismatch between repricings or maturities within a time period is commonly referred to as the "gap" for that period. A positive gap (asset sensitive), where interest rate sensitive assets exceed interest rate sensitive liabilities, generally will result in the net interest margin increasing in a rising rate environment and decreasing in a falling rate environment. A negative gap (liability sensitive) will generally have the opposite results on the net interest margin. To reflect anticipated prepayments, certain asset and liability categories are shown in the table using estimated cash flows rather than contractual cash flows.

Interest Rate Sensitivity Gap Analysis
December 31, 2011

<i>(in thousands)</i>	0-3 mo Balance	4-12 mo Balance	1-3 yr Balance	3+ yr Balance	Total Balance
Assets:

Stockholders' equity					616,331
Total					<u>\$2,368,275</u>

(1) Securities based on fair market value.

(2) Loans include loans held for sale and are stated at gross.

The table above sets forth the balances as of December 31, 2011 for interest bearing assets, interest bearing liabilities, and the total of non-interest bearing deposits and stockholders' equity. While a gap interest table is useful in analyzing interest rate sensitivity, an interest rate sensitivity simulation provides a better illustration of the sensitivity of earnings to changes in interest rates. Earnings are also affected by the effects of changing interest rates on the value of funding derived from demand deposits and stockholders' equity. We perform a sensitivity analysis to identify interest rate risk exposure on net interest income. We quantify and measure interest rate risk exposure using a model to dynamically simulate the effect of changes in net interest income relative to changes in interest rates and account balances over the next twelve months based on three interest rate scenarios. These are a "most likely" rate scenario and two "shock test" scenarios.

The "most likely" rate scenario is based on the consensus forecast of future interest rates published by independent sources. These forecasts incorporate future spot rates and relevant spreads of instruments that

are actively traded in the open market. The Federal Reserve’s Federal Funds target affects short-term borrowing; the prime lending rate and the LIBOR are the basis for most of our variable-rate loan pricing. The 10-year mortgage rate is also monitored because of its effect on prepayment speeds for mortgage-backed securities. These are our primary interest rate exposures. We are currently not using derivatives to manage our interest rate exposure.

The two “shock test” scenarios assume a sustained parallel 200 basis point increase or decrease, respectively, in interest rates. As short-term rates continued to fall during 2009 and remain low in 2010, we could not assume interest rate changes of any amount as the results of the decreasing rates scenario would not be meaningful. We will continue to evaluate these scenarios as interest rates change, until short-term rates rise above 3.0%.

Our interest rate risk exposure model incorporates assumptions regarding the level of interest rate or balance changes on indeterminable maturity deposits (demand deposits, interest bearing transaction accounts and savings accounts) for a given level of market rate changes. These assumptions have been developed through a combination of historical analysis and future expected pricing behavior. Changes in prepayment behavior of mortgage-backed securities, residential and commercial mortgage loans in each rate environment are captured using industry estimates of prepayment speeds for various coupon segments of the portfolio. The impact of planned growth and new business activities is factored into the simulation model. This modeling indicated interest rate sensitivity as follows (in thousands):

	Anticipated Impact Over the Next Twelve Months as Compared to Most Likely Scenario	
	200 bp Increase December 31, 2011	200 bp Increase December 31, 2010
Change in net interest income	\$25,368	\$19,762

The simulations used to manage market risk are based on numerous assumptions regarding the effect of changes in interest rates on the timing and extent of repricing characteristics, future cash flows and customer behavior. These assumptions are inherently uncertain and, as a result, the model cannot precisely estimate net interest income or precisely predict the impact of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies, among other factors.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Texas Capital Bancshares, Inc.

We have audited the accompanying consolidated balance sheets of Texas Capital Bancshares, Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Texas Capital Bancshares, Inc. at December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Texas Capital Bancshares, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 23, 2012 expressed an unqualified opinion thereon.

See accompanying notes to consolidated financial statements.

(1) Operations and Summary of Significant Accounting Policies

Organization and Nature of Business

Texas Capital Bancshares, Inc. (“the Company”), a Delaware financial holding company, was incorporated in November 1996 and commenced doing business in March 1998, but did not commence banking operations until December 1998. The consolidated financial statements of the Company include the accounts of Texas Capital Bancshares, Inc. and its wholly owned subsidiary, Texas Capital Bank, National Association (“the Bank”). The Bank currently provides commercial banking services to its customers in Texas and concentrates on middle market commercial businesses and successful professionals and entrepreneurs.

Basis of Presentation

The accounting and reporting policies of Texas Capital Bancshares, Inc. conform to accounting principles generally accepted in the United States and to generally accepted practices within the banking industry. Our consolidated financial statements include the accounts of Texas Capital Bancshares, Inc. and its subsidiary, the Bank. Certain prior period balances have been reclassified to conform to the current period presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for possible loan losses, the fair value of stock-based compensation awards, the fair values of financial instruments and the status of contingencies are particularly susceptible to significant change in the near term.

Cash and Cash Equivalents

Cash equivalents include amounts due from banks and federal funds sold.

Securities

Securities are classified as trading, available-for-sale or held-to-maturity. Management classifies securities at the time of purchase and re-assesses such designation at each balance sheet date; however, transfers between categories from this re-assessment are rare.

Trading Account

Securities acquired for resale in anticipation of short-term market movements are classified as trading, with realized and unrealized gains and losses recognized in income. To date, we have not had any activity in our trading account.

Held-to-Maturity and Available-for-Sale

Debt securities are classified as held-to-maturity when we have the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at amortized cost. Debt securities not classified as held-to-maturity or trading and marketable equity securities not classified as trading are classified as available-for-sale.

Available-for-sale securities are stated at fair value, with the unrealized gains and losses reported in a separate component of accumulated other comprehensive income (loss), net of tax. The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity, or in the case of mortgage-backed securities, over the estimated life of the security. Such amortization and accretion is included in interest income from securities. Realized gains and losses and declines in value judged to be other-than-temporary are included in gain (loss) on sale of securities. The cost of securities sold is based on the specific identification method.

All securities are available-for-sale as of December 31, 2011 and 2010.

Loans

Loans Held for Investment

Loans held for investment (which include equipment leases accounted for as financing leases) are stated at the amount of unpaid principal reduced by deferred income (net of costs). Interest on loans is recognized using the simple-interest method on the daily balances of the principal amounts outstanding. Loan origination fees, net of direct loan origination costs, and commitment fees, are deferred and amortized as an adjustment to yield over the life of the loan, or over the commitment period, as applicable.

A loan held for investment is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due (both principal and interest) according to the terms of the loan agreement. Reserves on impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the underlying collateral. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

The accrual of interest on loans is discontinued when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, which is generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining book balance of the asset is deemed to be collectible. If collectibility is questionable, then cash payments are applied to principal. A loan is placed back on accrual status when both principal and interest are current and it is probable that we will be able to collect all amounts due (both principal and interest) according to the terms of the loan agreement.

Loans Held for Sale

We purchase participations in mortgage loans primarily for sale in the secondary market through our mortgage warehouse lending division. These are participations purchased from non-bank mortgage originators who are seeking additional funding through participation interests to facilitate their ability to originate loans in their own name. The mortgage originator has no obligation to offer and we have no obligation to purchase these participation interests. The originator closes mortgage loans consistent with underwriting standards established by approved investors and once the loan closes, the originator delivers the loan to the investor. We typically purchase up to a 99% participation interest with the originator financing the remaining percentage. These loans are held by us for an interim period, usually less than 30 days and more typically 10-15 days. Accordingly, these loans are classified as held for sale and are carried at the lower of cost or fair value, determined on an aggregate basis.

As a result of dislocations in the mortgage industry starting in 2007, some loan participations were not sold within the normal time frames or at previously negotiated prices. Due to market conditions, certain mortgage warehouse lending loans were transferred to our loans held for investment portfolio at the lower of cost or market. Mortgage warehouse lending loans transferred to our loans held for investment portfolio could require future allocations of the allowance for loan losses or be subject to charge off in the event the loans become impaired.

Allowance for Loan Losses

The allowance for loan losses is established through a provision for loan losses charged against income. The allowance for loan losses includes specific reserves for impaired loans and an estimate of losses inherent in the loan portfolio at the balance sheet date, but not yet identified with specific loans. Loans deemed to be uncollectible are charged against the allowance when management believes that the collectibility of the principal is unlikely and subsequent recoveries, if any, are credited to the allowance. Management's periodic evaluation of the adequacy of the allowance is based on an assessment of the current loan portfolio, including known inherent risks, adverse situations that may affect the borrowers' ability to repay, the estimated value of any underlying collateral and current economic conditions.

Repossessed Assets

Repossessed assets, which are included in other assets on the balance sheet, consist of collateral that has been repossessed. Collateral that has been repossessed is recorded at fair value less selling costs through a charge to the allowance for loan losses, if necessary. Write-downs are provided for subsequent declines in value and are recorded in other non-interest expense.

Other Real Estate Owned

OREO, which is included in other assets on the balance sheet, consists of real estate that has been foreclosed. Real estate that has been foreclosed is recorded at the fair value of the real estate, less selling costs, through a charge to the allowance for loan losses, if necessary. Subsequent write-downs required for declines in value are recorded through a valuation allowance, or taken directly to the asset, charged to other non-interest expense.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, which range from three to ten years. Gains or losses on disposals of premises and equipment are included in results of operations.

Marketing and Software

Marketing costs are expensed as incurred. Ongoing maintenance and enhancements of websites are expensed as incurred. Costs incurred in connection with development or purchase of internal use software are capitalized and amortized over a period not to exceed five years. Internal use software costs are included in other assets in the consolidated financial statements.

Goodwill and Other Intangible Assets

Intangible assets are acquired assets that lack physical substance but can be distinguished from goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset, or liability. Our intangible assets relate primarily to loan customer relationships. Intangible assets with definite useful lives are amortized on an accelerated basis over their estimated life. Intangible assets are tested for impairment annually or whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Segment Reporting

We have determined that all of our lending divisions and subsidiaries meet the aggregation criteria of ASC 280, *Segment Reporting*, since all offer similar products and services, operate with similar processes, and have similar customers.

Stock-based Compensation

We account for all stock-based compensation transaction in accordance with ASC 718, *Compensation — Stock Compensation* (“ASC 718”), which requires that stock compensation transactions be recognized as compensation expense in the statement of operations based on their fair values on the measurement date, which is the date of the grant. We transitioned to fair value based accounting for stock-based compensation using a modified version of prospective application (“modified prospective application”). Under modified prospective application, as it is applicable to us, ASC 718 applies to new awards and to awards modified, repurchased or cancelled after January 1, 2006. Additionally, compensation expense for the portion of awards for which the requisite period has not been rendered (generally referring to nonvested awards) that are outstanding as of January 1, 2006 are being recognized as the remaining requisite service is rendered during and after the period of adoption of ASC 718.

The compensation expense for the earlier awards is based on the same method and on the same grant date fair values previously determined for the pro forma disclosures required for all companies that did not previously adopt the fair value accounting method for stock-based compensation.

Accumulated Other Comprehensive Income

Unrealized gains or losses on our available-for-sale securities (after applicable income tax expense or benefit) are included in accumulated other comprehensive income (loss), net. Accumulated comprehensive income (loss), net for the three years ended December 31, 2011 is reported in the accompanying consolidated statements of changes in stockholders' equity.

Income Taxes

The Company and its subsidiary file a consolidated federal income tax return. We utilize the liability method in accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based upon the difference between the values of the assets and liabilities as reflected in the financial statements and their related tax basis using enacted tax rates in effect for the year in which the differences are expected to be recovered or settled. As changes in tax law or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. A valuation reserve is provided against deferred tax assets unless it is more likely than not that such deferred tax assets will be realized.

Basic and Diluted Earnings Per Common Share

Basic earnings per common share is based on net income available to common stockholders divided by the weighted-average number of common shares outstanding during the period excluding non-vested stock. Diluted earnings per common share include the dilutive effect of stock options and non-vested stock awards granted using the treasury stock method. A reconciliation of the weighted-average shares used in calculating basic earnings per common share and the weighted average common shares used in calculating diluted earnings per common share for the reported periods is provided in Note 14 — Earnings Per Share.

Fair Values of Financial Instruments

ASC 820, *Fair Value Measurements and Disclosures* ("ASC 820"), defines fair value, establishes a framework for measuring fair value under GAAP and enhances disclosures about fair value measurements.

(2) Securities

The following is a summary of securities (in thousands):

	December 31, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-Sale Securities:				
Residential mortgage-backed securities	\$ 84,363	\$5,720	\$—	\$ 90,083
Corporate securities	5,000	225	—	5,225
Municipals	29,577	1,165	—	30,742
Equity securities(1)	7,506	154	—	7,660
Other	10,000	—	—	10,000
	\$136,446	\$7,264	\$—	\$143,710
	December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-Sale Securities:				
Residential mortgage-backed securities	\$126,838	\$6,891	\$(5)	\$133,724
Corporate securities	5,000	—	—	5,000
Municipals	37,841	1,244	—	39,085
Equity securities(1)	7,506	109	—	7,615
	\$177,185	\$8,244	\$(5)	\$185,424

(1) Equity securities consist of Community Reinvestment Act funds.

The amortized cost and estimated fair value of securities are presented below by contractual maturity (in thousands, except percentage data):

	December 31, 2011				
	Less Than One Year	After One Through Five Years	After Five Through Ten Years	After Ten Years	Total
Available-for-sale:					
Residential mortgage-backed securities:(1)					
Amortized cost	\$ 13	\$10,420	\$31,502	\$42,428	\$ 84,363
Estimated fair value	13	11,095	33,745	45,230	90,083
Weighted average yield(3)	6.50%	4.85%	4.71%	3.79%	4.26%
Corporate securities:					
Amortized cost	—	5,000	—	—	5,000
Estimated fair value	—	5,225	—	—	5,225
Weighted average yield(3)	—	7.38%	—	—	7.38%
Municipals:(2)					
Amortized cost	4,184	18,980	6,413	—	29,577
Estimated fair value	4,213	19,784	6,745	—	30,742
Weighted average yield(3)	5.36%	5.51%	5.86%	—	5.57%
Equity securities:					
Amortized cost	7,506	—	—	—	7,506
Estimated fair value	7,660	—	—	—	7,660
Other:(3)					
Amortized cost	10,000	—	—	—	10,000
Estimated fair value	10,000	—	—	—	10,000
Weighted average yield	0.10%	—	—	—	0.10%
Total available-for-sale securities:					
Amortized cost					<u>\$136,446</u>
Estimated fair value					<u>\$143,710</u>

(1) Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without prepayment penalties. The average expected life of the mortgage-backed securities was 1.7 years at December 31, 2011.

(2) Yields have been adjusted to a tax equivalent basis assuming a 35% federal tax rate.

(3) Yields are calculated based on amortized cost.

Securities with carrying values of approximately \$95,573,000 and \$42,253,000 were pledged to secure certain borrowings and deposits at December 31, 2011 and 2010, respectively. See Note 8 for discussion of securities securing borrowings. Of the pledged securities at December 31, 2011 and 2010, approximately \$67,247,000 and \$20,613,000, respectively, were pledged for certain deposits.

At December 31, 2011 we did not have any investment securities in an unrealized loss position. The following table discloses, as of December 31, 2010, our investment securities that have been in a continuous unrealized loss position for less than 12 months and those that have been in a continuous unrealized loss position for 12 or more months (in thousands):

	Less Than 12 Months		12 Months or Longer		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
Mortgage-backed securities	\$3,681	\$(5)	\$—	\$—	\$3,681	\$(5)

At December 31, 2010, the number of investment positions in an unrealized loss position totaled 1. The unrealized losses at December 31, 2010 were interest rate related, and losses have decreased as rates decreased in 2009 and remained low during 2010 and 2011. We do not believe these unrealized losses are “other than temporary” as (1) we do not have the intent to sell any of the securities in the table above; and (2) it is not probable that we will be unable to collect the amounts contractually due. We have not identified any issues related to the ultimate repayment of principal as a result of credit concerns on these securities.

Unrealized gains or losses on our available-for-sale securities (after applicable income tax expense or benefit) are included in accumulated other comprehensive income (loss), net. We had comprehensive income of \$75.3 million for the year ended December 31, 2011 and comprehensive income of \$36.4 million for the year ended December 31, 2010. Comprehensive income during the year ended December 31, 2011 included a net after-tax loss of \$633,000, and comprehensive income during the year ended December 31, 2010 included a net after-tax loss of \$810,000 due to changes in the net unrealized gains/losses on securities available-for-sale.

(3) Loans

Loans held for investment are summarized by category as follows (in thousands):

	December 31	
	2011	2010
Commercial	\$3,275,150	\$2,592,924
Construction	422,026	270,008
Real estate	1,819,251	1,759,758
Consumer	24,822	21,470
Equipment leases	61,792	95,607
Gross loans held for investment	5,603,041	4,739,767
Deferred income (net of direct origination costs)	(30,670)	(28,437)
Allowance for loan losses	(70,295)	(71,510)
Total loans held for investment, net	5,502,076	4,639,820
Loans held for sale	2,080,081	1,194,209
Total	\$7,582,157	\$5,834,029

Commercial Loans and Leases. Our commercial loan portfolio is comprised of lines of credit for working capital and term loans and leases to finance equipment and other business assets. Our energy production loans are generally collateralized with proven reserves based on appropriate valuation standards. Our commercial loans and leases are underwritten after carefully evaluating and understanding the borrower’s ability to operate profitably. Our underwriting standards are designed to promote relationship banking rather than making loans on a transaction basis. Our lines of credit typically are limited to a percentage of the value of the assets securing the line. Lines of credit and term loans typically are reviewed annually and are supported by accounts receivable, inventory, equipment and other assets of our clients’ businesses.

Real Estate Loans. A portion of our real estate loan portfolio is comprised of loans secured by properties other than market risk or investment-type real estate. Market risk loans are real estate loans where the primary source of repayment is expected to come from the sale or lease of the real property collateral. We generally provide temporary financing for commercial and residential property. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Our real estate loans generally have maximum terms of five to seven years, and we provide loans with both floating and fixed rates. We generally avoid long-term loans for commercial real estate held for investment. Real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. Appraised values may be highly variable due to market conditions and impact of the inability of potential purchasers and lessees to obtain financing and lack of transactions at comparable values.

Construction Loans. Our construction loan portfolio consists primarily of single- and multi-family residential properties and commercial projects used in manufacturing, warehousing, service or retail businesses. Our construction loans generally have terms of one to three years. We typically make construction loans to developers, builders and contractors that have an established record of successful project completion and loan repayment and have a substantial investment in the borrowers' equity. However, construction loans are generally based upon estimates of costs and value associated with the completed project. Sources of repayment for these types of loans may be pre-committed permanent loans from other lenders, sales of developed property, or an interim loan commitment from us until permanent financing is obtained. The nature of these loans makes ultimate repayment extremely sensitive to overall economic conditions. Borrowers may not be able to correct conditions of default in loans, increasing risk of exposure to classification, NPA status, reserve allocation and actual credit loss and foreclosure. These loans typically have floating rates and commitment fees.

Loans Held for Sale. Our loans held for sale consist of participations purchased in single-family residential mortgages funded through our warehouse lending group. These loans are typically on our balance sheet for 10 to 20 days or less. We have agreements with mortgage lenders and participate in individual loans they originate. All loans are underwritten consistent with established programs for permanent financing with financially sound investors. Substantially all loans are conforming loans.

As of December 31, 2011, a substantial majority of the principal amount of the loans held for investment in our portfolio was to businesses and individuals in Texas. This geographic concentration subjects the loan portfolio to the general economic conditions within this area. The risks created by this concentration have been considered by management in the determination of the adequacy of the allowance for loan losses. Management believes the allowance for loan losses is appropriate to cover estimated losses on loans at each balance sheet date.

The reserve for loan losses is comprised of specific reserves for impaired loans and an estimate of losses inherent in the portfolio at the balance sheet date, but not yet identified with specified loans. We regularly evaluate our reserve for loan losses to maintain an appropriate level to absorb estimated loan losses inherent in the loan portfolio. Factors contributing to the determination of reserves include the credit worthiness of the borrower, changes in the value of pledged collateral, and general economic conditions. All loan commitments rated substandard or worse and greater than \$500,000 are specifically reviewed for loss potential. For loans deemed to be impaired, a specific allocation is assigned based on the losses expected to be realized from those loans. For purposes of determining the general reserve, the portfolio is segregated by product types to recognize differing risk profiles among categories, and then further segregated by credit grades. Credit grades are assigned to all loans. Each credit grade is assigned a risk factor, or reserve allocation percentage. These risk factors are multiplied by the outstanding principal balance and risk-weighted by product type to calculate the required reserve. A similar process is employed to calculate a reserve assigned to off-balance sheet commitments, specifically unfunded loan commitments and letters of credit, and any needed reserve is recorded in other liabilities. Even though portions of the allowance may be allocated to specific loans, the entire allowance is available for any credit that, in management's judgment, should be charged off.

We have several pass credit grades that are assigned to loans based on varying levels of risk, ranging from credits that are secured by cash or marketable securities, to watch credits which have all the characteristics of an acceptable credit risk but warrant more than the normal level of monitoring. Within our criticized/classified credit grades are special mention, substandard, and doubtful. Special mention loans are those that are currently protected by sound worth and paying capacity of the borrower, but that are potentially weak and constitute an additional credit risk. The loan has the potential to deteriorate to a substandard grade due to the existence of financial or administrative deficiencies. Substandard loans have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Some substandard loans are inappropriately protected by sound worth and paying capacity of the borrower and of the collateral pledged and may be considered impaired. Substandard loans can be accruing or can be on nonaccrual depending on the circumstances of the individual loans. Loans classified as doubtful have all the weaknesses inherent in

substandard loans with the added characteristics that the weaknesses make collection or liquidation in full highly questionable and improbable. The possibility of loss is extremely high. All doubtful loans are on nonaccrual.

The reserve allocation percentages assigned to each credit grade have been developed based primarily on an analysis of our historical loss rates. The allocations are adjusted for certain qualitative factors for such things as general economic conditions, changes in credit policies and lending standards. Historical loss rates are adjusted to account for current environmental conditions which we believe are likely to cause loss rates to be higher or lower than past experience. Each quarter we produce an adjustment range for environmental factors unique to us and our market. Changes in the trend and severity of problem loans can cause the estimation of losses to differ from past experience. In addition, the reserve considers the results of reviews performed by independent third party reviewers as reflected in their confirmations of assigned credit grades within the portfolio. The portion of the allowance that is not derived by the allowance allocation percentages compensates for the uncertainty and complexity in estimating loan and lease losses including factors and conditions that may not be fully reflected in the determination and application of the allowance allocation percentages. We evaluate many factors and conditions in determining the unallocated portion of the allowance, including the economic and business conditions affecting key lending areas, credit quality trends and general growth in the portfolio. The allowance is considered appropriate, given management's assessment of potential losses within the portfolio as of the evaluation date, the significant growth in the loan and lease portfolio, current economic conditions in the Company's market areas and other factors.

The methodology used in the periodic review of reserve adequacy, which is performed at least quarterly, is designed to be dynamic and responsive to changes in portfolio credit quality. The changes are reflected in the general reserve and in specific reserves as the collectability of larger classified loans is evaluated with new information. As our portfolio has matured, historical loss ratios have been closely monitored, and our reserve adequacy relies primarily on our loss history. Currently, the review of reserve adequacy is performed by executive management and presented to our board of directors for their review, consideration and ratification on a quarterly basis.

The following tables summarize the credit risk profile of our loan portfolio by internally assigned grades and nonaccrual status as of December 31, 2011 and 2010 (in thousands):

	Commercial	Construction	Real Estate	Consumer	Leases	Total
December 31, 2011						
Grade:						
Pass	\$3,185,625	385,639	1,717,434	24,453	57,255	5,370,406

We have traditionally maintained an unallocated reserve component to allow for uncertainty in economic and other conditions affecting the quality of the loan portfolio. The unallocated portion of our loan loss reserve has increased since December 31, 2010. We believe the level of unallocated reserves at December 31, 2011 is warranted due to the ongoing weak economic environment which has produced more frequent losses, including those resulting from fraud by borrowers. Our methodology used to calculate the allowance

considers historical losses, however, the historical loss rates for specific product types or credit risk grades may not fully incorporate the effects of continued weakness in the economy. In addition, a substantial portion of losses realized over the past several years related to commercial real estate loans. Continuing uncertainty and illiquidity in the commercial real estate market has produced and continues to cause material changes in appraised values that can influence our impairment calculations on currently impaired loans and on pass-rated loans that may experience weakness if economic conditions and valuations do not stabilize.

The table below presents a summary of our loan loss experience for the year ended December 31, 2009 (in thousands):

	Year ended December 31, 2009
Reserve for loan losses:	
Beginning balance	\$45,365
Loans charged-off:	
Commercial	4,000
Real estate — Construction	6,508
Real estate — Term	4,696
Consumer	502
Equipment Leases	4,022
Total	19,728
Recoveries:	
Commercial	124
Real estate — Construction	13
Real estate — Term	53
Consumer	28
Equipment Leases	54
Total	272
Net charge-offs	19,456
Provision for loan losses	42,022
Ending balance	\$67,931
Reserve for off-balance sheet credit losses:	
Beginning balance	\$ 1,470
Provision for off-balance sheet credit losses	1,478
Ending balance	\$ 2,948
Total reserve for credit losses	\$70,879
Total provision for credit losses	\$43,500

Generally we place loans on non-accrual when there is a clear indication that the borrower's cash flow may not be sufficient to meet payments as they become due, which is generally when a loan is 90 days past due. When a loan is placed on non-accrual status, all previously accrued and unpaid interest is reversed. Interest income is subsequently recognized on a cash basis as long as the remaining unpaid principal amount of the loan is deemed to be fully collectible. If collectability is questionable, then cash payments are applied to principal. We recognized \$2.2 million in interest income on non-accrual loans during 2011 compared to \$566,000 in 2010 and \$25,000 in 2009. Additional interest income that would have been recorded if the loans had been current during the years ended December 31, 2011, 2010 and 2009 totaled \$5.9 million, \$10.5 million and \$3.6 million, respectively. As of December 31, 2011, \$19.2 million of our non-accrual loans were earning on a cash basis. A loan is placed back on accrual status when both principal and interest

are current and it is probable that we will be able to collect all amounts due (both principal and interest) according to the terms of the loan agreement. The table below summarizes our non-accrual loans by type and purpose as of December 31, 2011 (in thousands):

Commercial	
Business loans	\$12,913
Construction	
Market risk	21,119
Real estate	
Market risk	11,140
Commercial	6,384
Secured by 1-4 family	2,279
Consumer	313
Leases	432
<hr/>	
Total non-accrual loans	\$54,580
<hr/>	

As of December 31, 2011, non-accrual loans included in the table above included \$13.8 million related to loans that met the criteria for restructured.

A loan held for investment is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due (both principal and interest) according to the terms of the loan agreement. In accordance with *FASB ASC 310 Receivables*, we have included accruing TDRs in our impaired loan totals. The following table details our impaired loans, by portfolio class as of December 31, 2011 (in thousands):

December 31, 2011

Total loans held for investment	\$16,933	\$13,574	\$5,467	\$35,974	\$5,512,487	\$5,548,461	\$5,467

(1) Loans past due 90 days and still accruing includes premium finance loans of \$2.5 million. These loans are generally secured by obligations of insurance carriers to refund premiums on cancelled insurance policies. The refund of premiums from the insurance carriers can take 180 days or longer from the cancellation date.

Restructured loans are loans on which, due to the borrower's financial difficulties, we have granted a concession that we would not otherwise consider. This may include a transfer of real estate or other assets from the borrower, a modification of loan terms, or a combination of the two. Modifications of terms that could potentially qualify as a restructuring include reduction of contractual interest rate, extension of the maturity date at a contractual interest rate lower than the current rate for new debt with similar risk, or a reduction of the face amount of debt, or either forgiveness of either principal or accrued interest. As of December 31, 2011, we have \$25.1 million in loans considered restructured that are not already on nonaccrual. Of the nonaccrual loans at December 31, 2011, \$13.8 million met the criteria for restructured. A loan continues to qualify as restructured until a consistent payment history or change in borrower's financial condition has been evidenced, generally no less than twelve months. Assuming that the restructuring agreement specifies an interest rate at the time of the restructuring that is greater than or equal to the rate that we are willing to accept for a new extension of credit with comparable risk, then the loan no longer has to be considered a restructuring if it is in compliance with modified terms in calendar years after the year of the restructure.

The following table summarizes, as of December 31, 2011, loans that have been restructured during 2011 (in thousands):

	Number of Contracts	Pre-Restructuring Outstanding Recorded Investment	Post-Restructuring Outstanding Recorded Investment
Commercial business loans	3	\$ 2,140	\$ 1,829
Construction market risk	1	2,620	1,882
Real estate market risk	9	43,374	30,193
Real estate — 1-4 family	1	1,217	1,327
Total new restructured loans in 2011	14	\$49,351	\$35,231

The restructured loans generally include terms to temporarily place loan on interest only, extend the payment terms or reduce the interest rate. We have not forgiven any principal on the above loans. The \$14.1 million decrease in the post-restructuring recorded investment compared to the pre-restructuring recorded investment is due to \$7.2 million in charge-offs and \$6.9 million in paydowns. At December 31, 2011, \$10.1 million of the above loans restructured in 2011 are on non-accrual.

The following table provides information on how loans were modified as a TDR during the year ended December 31, 2011 (in thousands):

Extended maturity	\$11,152
Adjusted payment schedule	19,806
Combination of maturity extension and payment schedule adjustment	3,855
Other	418
Total	\$35,231

The following table summarizes, as of December 31, 2011, loans that were restructured within the last 12 months that have subsequently defaulted (in thousands):

	Number of Contracts	Recorded Investment
Real estate — market risk	1	\$4,371

The loan above was subsequently foreclosed and is included in the December 31, 2011 OREO balance.

(4) OREO and Valuation Allowance for Losses on OREO

The table below presents a summary of the activity related to OREO (in thousands):

	Year ended December 31		
	2011	2010	2009
Beginning balance	\$ 42,261	\$27,264	\$ 25,904
Additions	22,180	29,559	23,466
Sales	(23,566)	(6,058)	(14,265)
Valuation allowance for OREO	(3,922)	(6,587)	(6,619)
Direct write-downs	(2,876)	(1,917)	(1,222)
Ending balance	\$ 34,077	\$42,261	\$ 27,264

(5) Goodwill and Other Intangible Assets

In June 2011, we acquired the assets of a premium finance company and recorded a total intangible asset of \$11.5 million. Of this total, \$7.2 million was allocated to goodwill, \$4.1 million to customer relationships and \$181,000 to trade name. The \$4.1 million customer relationship intangible will be amortized over 18 years and the \$181,000 intangible related to the trade name will be amortized over 5 years.

In November 2009, we acquired another premium finance company and recorded a total intangible asset of \$2.3 million. Of this total, \$224,000 was allocated to goodwill, \$1.9 million to customer relationships and \$162,000 to trade name. The \$1.9 million customer relationship intangible will be amortized over 15 years and the \$162,000 intangible related to the trade name will be amortized over 5 years.

Goodwill and other intangible assets at December 31, 2011 and 2010 are summarized as follows (in thousands):

	Gross Goodwill and Intangible Assets	Accumulated Amortization	Net Goodwill and Intangible Assets
December 31, 2011			
Goodwill	\$14,416	\$ (374)	\$14,042
Intangible assets—customer relationships and trademarks	7,996	(1,558)	6,438
Total goodwill and intangible assets	\$22,412	\$(1,932)	\$20,480
December 31, 2010			
Goodwill	\$ 7,225	\$ (374)	\$ 6,851
Intangible assets—customer relationships and trademarks	3,705	(1,073)	2,632
Total goodwill and intangible assets	\$10,930	\$(1,447)	\$ 9,483

Amortization expense related to intangible assets totaled \$485,000 in 2011 and \$323,000 in 2010 and \$189,000 in 2009. The estimated aggregate future amortization expense for intangible assets remaining as of December 31, 2011 is as follows (in thousands):

2012	\$ 587
2013	587
2014	582
2015	481
2016	383
Thereafter	3,818
	\$6,438

(6) Premises and Equipment

Premises and equipment at December 31, 2011 and 2010 are summarized as follows (in thousands):

	December 31	
	2011	2010
Premises	\$ 11,967	\$ 11,092
Furniture and equipment	24,290	22,159
	36,257	33,251
Accumulated depreciation	(24,800)	(21,683)
Total premises and equipment, net	\$ 11,457	\$ 11,568

Depreciation expense for the above premises and equipment was approximately \$3,397,000, \$3,201,000 and \$3,311,000 in 2011, 2010 and 2009, respectively.

(7) Deposits

Deposits at December 31, 2011 and 2010 are as follows (in thousands):

	2011	2010
Non-interest bearing demand deposits	\$1,751,944	\$1,451,307
Interest-bearing deposits		
Transaction	448,730	346,052
Savings	2,288,804	2,348,860
Time	586,506	850,234
Deposits in foreign branches	480,273	458,948
Total interest-bearing deposits	3,804,313	4,004,094
Total deposits	\$5,556,257	\$5,455,401

The scheduled maturities of interest bearing time deposits are as follows at December 31, 2011 (in thousands):

2012	\$1,026,174
2013	21,742
2014	8,693
2015	8,567
2016	834
2017 and after	769
	\$1,066,779

At December 31, 2011 and 2010, the Bank had approximately \$26,549,000 and \$44,753,000, respectively, in deposits from related parties, including directors, stockholders, and their related affiliates on terms similar to those from third parties.

At December 31, 2011 and 2010, interest bearing time deposits, including deposits in foreign branches, of \$100,000 or more were approximately \$1,029,352,000 and \$1,238,526,000, respectively.

(8) Borrowing Arrangements

The following table summarizes our borrowings at December 31, 2011, 2010 and 2009 (in thousands):

	2011		2010		2009	
	Balance	Rate(4)	Balance	Rate(4)	Balance	Rate(4)
Federal funds purchased(5)	\$ 412,249	0.27%	\$283,781	0.32%	\$ 580,519	0.33%
Customer repurchase agreements(1)	23,801	0.06%	10,920	0.05%	25,070	0.10%
Treasury, tax and loan notes(2)	—	—	3,100	0.00%	5,940	0.00%
FHLB borrowings(3)	1,200,066	0.14%	86	2.21%	325,000	0.11%
Fed borrowings	132,000	0.75%	—	—	—	—
TLGP borrowings	—	—	—	—	20,500	0.84%
Trust preferred subordinated debentures	113,406	2.48%	113,406	2.23%	113,406	3.19%
Total borrowings	\$1,881,522		\$411,293		\$1,070,435	
Maximum outstanding at any month end	\$1,986,324		\$653,665		\$1,753,181	

- (1) Securities pledged for customer repurchase agreements were \$28.3 million, \$21.6 million and \$36.0 million at December 31, 2011, 2010 and 2009, respectively.
- (2) Securities pledged for treasury, tax and loans notes were \$5.7 million, \$7.4 million and \$11.3 million at December 31, 2011, 2010 and 2009, respectively.
- (3) FHLB borrowings are collateralized by a blanket floating lien based on real estate loans and also certain pledged securities. The weighted-average interest rate for the years ended December 31, 2011, 2010 and 2009 was 0.11%, 0.14% and 0.62%, respectively.
- (4) Interest rate as of period end.
- (5) The weighted-average interest rate on federal funds purchased for the years ended December 31, 2011, 2010 and 2009 was 0.25%, 0.44% and 0.47%, respectively.

The following table summarizes our other borrowing capacities in addition to balances outstanding at December 31, 2011, 2010 and 2009 (in thousands):

	2011	2010	2009
FHLB borrowing capacity relating to loans	\$ 4,524	\$869,089	\$1,382,682
FHLB borrowing capacity relating to securities	15,909	120,823	57,101
Total FHLB borrowing capacity	\$ 20,433	\$989,912	\$1,439,783
Unused federal funds lines available from commercial banks	\$390,720	\$482,460	\$ 736,560

The scheduled maturities of our borrowings at December 31, 2011, were as follows (in thousands):

	Within One Year	After One But Within Three Years	After Three But Within Five Years	After Five Years	Total
Federal funds purchased(1)	\$ 412,249	\$—	\$—	\$ —	\$ 412,249
Customer repurchase agreements(1)	23,801	—	—	—	23,801
FHLB borrowings(1)	1,200,000	—	66	—	1,200,066
Fed borrowings(1)	132,000	—	—	—	132,000
Trust preferred subordinated debentures(1)	—	—	—	113,406	113,406
Total borrowings	\$1,768,050	\$—	\$66	\$113,406	\$1,881,522

- (1) Excludes interest.

(9) Trust Preferred Subordinated Debentures

From November 2002 to September 2006 various Texas Capital Statutory Trusts were created and subsequently issued fixed and/or floating rate Capital Securities in various private offerings totaling \$113.4 million. As of December 31, 2011, the details of the trust preferred subordinated debentures are summarized below (in thousands):

	Texas Capital Bancshares Statutory Trust I	Texas Capital Bancshares Statutory Trust II	Texas Capital Bancshares Statutory Trust III	Texas Capital Bancshares Statutory Trust IV	Texas Capital Bancshares Statutory Trust V
Date issued	November 19, 2002	April 10, 2003	October 6, 2005	April 28, 2006	September 29, 2006
Capital securities issued	\$ 10,310	\$ 10,310	\$ 25,774	\$ 25,774	\$ 41,238
Floating or fixed rate securities	Floating	Floating	Fixed/Floating(1)	Floating	Floating
Interest rate on subordinated debentures	3 month LIBOR + 3.35%	3 month LIBOR + 3.25%	3 month LIBOR + 1.51%	3 month LIBOR + 1.60%	3 month LIBOR + 1.71%
Maturity date	November 2032	April 2033	December 2035	June 2036	September 2036

- (1) Interest rate is a fixed rate of 6.19% for five years through December 15, 2010, and a floating rate of interest for the remaining 25 years that resets quarterly to 1.51% above the three-month LIBOR.

After deducting underwriter's compensation and other expenses of each offering, the net proceeds were available to the Company to increase capital and for general corporate purposes, including use in investment and lending activities. Interest payments on all subordinated debentures are deductible for federal income tax purposes.

(10) Income Taxes

We have a gross deferred tax asset of \$49.4 million at December 31, 2011, which relates primarily to our allowance for loan losses, OREO valuation reserve, loan origination fees and stock compensation. Management believes it is more likely than not that all of the deferred tax assets will be realized. Our net deferred tax asset is included in other assets in the consolidated balance sheet.

At December 31, 2010, we had a gross deferred tax asset of \$48.1 million, which related primarily to our allowance for loan losses, OREO valuation reserve, loan origination fees and stock compensation.

Income tax expense/(benefit) consists of the following for the years ended (in thousands):

	Year ended December 31		
	2011	2010	2009
Current:			
Federal	\$47,799	\$24,329	\$20,955
State	1,183	840	219
Total	\$48,982	\$25,169	\$21,174
Deferred			
Federal	\$(6,927)	\$(5,248)	\$(8,774)
State	245	(365)	—
Total	\$(6,682)	\$(5,613)	\$(8,774)
Total expense			
Federal	\$40,872	\$19,081	\$12,181
State	1,428	475	219
Total	\$42,300	\$19,556	\$12,400

The following table shows the breakdown of total income tax expense for continuing operations and discontinued operations for the years ended December 31, 2011, 2010 and 2009 (in thousands):

	2011	2010	2009
Total expense (benefit):			
From continuing operations	\$42,366	\$19,626	\$12,522
From discontinued operations	(66)	(70)	(122)
Total	\$42,300	\$19,556	\$12,400

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of deferred tax assets and liabilities are as follows (in thousands):

	December 31	
	2011	2010
Deferred tax assets:		
Allowance for credit losses	\$ 25,787	\$ 26,426
Organizational costs/intangibles	142	162
Loan origination fees	6,432	4,774
Stock compensation	3,776	5,769
Mark to market on mortgage loans	401	486
Reserve for potential mortgage loan repurchases	19	453
Non-accrual interest	5,416	3,009
Deferred lease expense	811	842
OREO valuation allowance	6,074	5,754
Other	526	432
	49,384	48,107
Deferred tax liabilities:		
Loan origination costs	(1,054)	(991)
FHLB stock dividends	(723)	(697)
Leases	(11,174)	(16,153)
Depreciation	(1,235)	(1,966)
Unrealized gain on securities	(2,542)	(2,884)
Other	(293)	(77)
	(17,021)	(22,768)
Net deferred tax asset	\$ 32,363	\$ 25,339

ASC 740-10, *Income Taxes — Accounting for Uncertainties in Income Taxes* (“ASC 740-10”) prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of cumulative benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. ASC 740-10 also provides guidance on the accounting for and disclosure of unrecognized tax benefits, interest and penalties.

We file income tax returns in the U.S. federal jurisdiction and several U.S. state jurisdictions. We are no longer subject to U.S. federal income tax examinations by tax authorities for years before 2008.

The reconciliation of income attributable to continuing operations computed at the U.S. federal statutory tax rates to income tax expense (benefit) is as follows:

	Year ended December 31		
	2011	2010	2009
Tax at U.S. statutory rate	35%	35%	35%
State taxes	1%	1%	1%
Non-deductible expenses	1%	1%	1%
Non-taxable income	(1)%	(2)%	(3)%
Total	36%	35%	34%

(11) Employee Benefits

We have a qualified retirement plan, with a salary deferral feature designed to qualify under Section 401 of the Internal Revenue Code (“the 401(k) Plan”). The 401(k) Plan permits our employees to defer a portion of their compensation. Matching contributions may be made in amounts and at times determined by the Company. We contributed approximately \$819,000, \$595,000, and \$627,000 for the years ended December 31, 2011, 2010 and 2009, respectively. Employees are eligible to participate in the 401(k) Plan when they meet certain requirements concerning minimum age and period of credited service. All contributions to the 401(k) Plan are invested in accordance with participant elections among certain investment options.

During 2000, we implemented an Employee Stock Purchase Plan (“ESPP”). Employees are eligible for the plan when they have met certain requirements concerning period of credited service and minimum hours worked. Eligible employees may contribute a minimum of 1% to a maximum of 10% of eligible compensation up to the Section 423 of the Internal Revenue Code limit of \$25,000. During January 2006, a plan (“2006 ESPP”) was adopted that allocated 400,000 shares to the plan. The 2006 ESPP was approved by stockholders at the 2006 annual meeting. As of December 31, 2011, 2010 and 2009, 76,561, 66,504 and 53,281 shares had been purchased on behalf of the employees under the 2006 ESPP.

As of December 31, 2010, we have three stock option plans, the 1999 Stock Omnibus Plan (“1999 Plan”), the 2005 Long-Term Incentive Plan (“2005 Plan”) and the 2010 Long-Term Incentive Plan (“2010 Plan”). The 1999 Plan is no longer available for grants of equity based compensation; however, options to purchase shares previously issued under the plan will remain outstanding and be subject to administration by our board of directors. Under both the 2005 and 2010 Plans, equity-based compensation grants were made by the board of directors, or its designated committee. Grants are subject to vesting requirements. Under the 2005 and 2010 Plans, we may grant, among other things, nonqualified stock options, incentive stock options, restricted stock units (“RSUs”), stock appreciation rights (“SARs”), cash-based performance units or any combination thereof. Both Plans include grants for employees and directors. Totals shares authorized under the 2005 plan are 1,500,000, with 700,000 authorized under the 2010 Plan. Total shares which may be issued under the 2005 Plan at December 31, 2011, 2010 and 2009 were 15,865, 60,760 and 116,728, respectively. Total shares which may be issued under the 2010 Plan at December 31, 2011 and 2010 was 431,200 and 498,400, respectively.

The fair value of our stock option and SAR grants are estimated at the date of grant using the Black-Scholes option pricing model. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because our employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management’s opinion, the existing models do not necessarily provide the best single measure of the fair value of its employee stock options.

The fair value of the options and stock appreciation rights were estimated at the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	2011	2010	2009
Risk-free rate	1.83%	2.26%	2.23%
Market price volatility factor	0.414	0.418	0.423
Weighted-average expected life of options	5 years	5 years	5 years

Market price volatility and expected life of options is based on historical data and other factors.

A summary of our stock option activity and related information for 2011, 2010 and 2009 is as follows (in thousands, except per share data):

	December 31, 2011		December 31, 2010		December 31, 2009	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Options outstanding at beginning of year	943,820	\$12.62	1,167,736	\$12.07	1,460,461	\$11.54
Options exercised	(374,410)	12.00	(155,366)	8.80	(226,485)	7.69
Options forfeited	—	—	(68,550)	11.33	(66,240)	15.35
Options outstanding at year-end	569,410	\$13.02	943,820	\$12.62	1,167,736	\$12.07
Options vested and exercisable at year-end	569,410	\$13.02	943,820	\$12.62	1,131,486	\$11.76
Intrinsic value of options vested and exercisable	\$10,015,721		\$8,263,646		\$2,490,378	
Weighted average remaining contractual life of options vested and exercisable (in years)	2.06		2.85		3.52	
Fair value of shares vested during year	\$ —		\$ 219,193		\$ 245,422	
Intrinsic value of options exercised	\$ 5,496,861		\$1,619,409		\$1,608,048	
Weighted average remaining contractual life of options currently outstanding (in years)	2.06		2.85		3.58	

There was no expense related to stock option awards in 2011. We expensed approximately \$219,000 and \$629,000 in 2010 and 2009, respectively, related to stock option awards. Expenses are calculated utilizing the straight-line method. No stock options were granted in 2009, 2010 or 2011.

In connection with the 2005 Long-term Incentive Plan, stock appreciation rights were issued in 2011, 2010 and 2009. These rights are service-based and generally vest over a period of five years. Of the SARs granted in 2006, 300,312 were Performance Stock Appreciation Rights (“PSARs”) which were cancelled on December 31, 2008 as company performance targets were not met.

	December 31, 2011		December 31, 2010		December 31, 2009	
	SARs	Weighted Average Exercise Price	SARs / PSARs	Weighted Average Exercise Price	SARs / PSARs	Weighted Average Exercise Price
SARs outstanding at beginning of year	1,213,257	\$19.42	1,206,738	\$16.16	1,007,579	\$16.66
SARs granted	33,000	24.70	109,500	17.81	246,500	14.93
SARs exercised	(236,610)	19.86	(16,000)	15.38	—	—
SARs forfeited	(25,947)	16.56	(86,981)	17.97	(47,341)	20.51
SARs outstanding at year-end	983,700	\$19.56	1,213,257	\$19.42	1,206,738	\$16.16
SARs vested and exercisable at year-end	687,175	\$20.29	689,144	\$20.48	491,254	\$20.92
Weighted average remaining contractual life of SARs vested		5.24		5.99		6.85
Compensation expense	\$1,272,000		\$1,994,000		\$1,709,000	
Weighted average fair value of SARs granted during 2011, 2010 and 2009 (in years)		\$ 9.54		\$ 6.97		\$ 5.93
Fair value of shares vested during the year	\$1,612,435		\$1,626,811		\$1,278,207	
Weighted average remaining contractual life of SARs currently outstanding (in years)		5.95		6.72		5.61

As of December 31, 2011 and 2010, the intrinsic value of SARs vested was \$7,093,144 and \$929,900, respectively. As of December 31, 2009 the intrinsic value of SARs vested was negative as the December 31, 2009 market prices were lower than the grant price of the SARs.

The following table summarizes the status of and changes in our nonvested restricted stock units (in thousands, except per share data):

	Non-Vested Stock Awards Outstanding	
	Number of Shares	Weighted-Average Grant-Date Fair Value
Balance, January 1, 2009	626,248	\$19.49
Granted	257,210	12.81
Vested and issued	(134,570)	19.59
Forfeited	(34,489)	19.98
Balance, December 31, 2009	714,399	17.04
Granted	365,000	15.72
Vested and issued	(162,394)	18.25
Forfeited	(19,654)	17.82
Balance, December 31, 2010	897,351	14.64
Granted	165,891	24.77
Vested and issued	(364,065)	16.07
Forfeited	(37,685)	18.70
Balance, December 31, 2011	661,492	\$17.44

The RSUs granted during 2011, 2010 and 2009 generally vest over four to five years. Compensation cost for restricted stock units was \$6,068,000, \$4,559,000, \$3,623,000 for years ended December 31, 2011, 2010 and 2009, respectively. The weighted average remaining contractual life of RSUs currently outstanding is 7.87 years.

In connection with the 2010 Long-term Incentive Plan, a total of 217,337 cash-based performance units were issued in 2011. Of the units, 54,400 are service-based and vest over a period of five years. Additionally, 162,937 units contain both service and performance based vesting requirements: 25% of the units will vest on the third anniversary of the date of grant, and 75% will vest based on attainment of certain performance metrics developed by our Board of Directors' HR Committee.

Total compensation cost for all share-based arrangements, net of taxes, was \$4,771,000, \$4,434,000 and \$3,904,000 for the years ended December 31, 2011, 2010 and 2009, respectively. Total compensation cost for all cash-based arrangements for the year ended December 31, 2011 was \$339,000.

Unrecognized stock-based compensation expense related to SAR grants issued through December 31, 2011 is \$1.7 million. At December 31, 2011, the weighted average period over which this unrecognized expense is expected to be recognized was 2.8 years. Unrecognized stock-based compensation expense related to RSU grants through December 31, 2011 is \$10.2 million. At December 31, 2011, the weighted average period over which this unrecognized expense is expected to be recognized was 3.2 years.

Cash flows from financing activities included \$8,970,000, \$1,774,000 and \$213,000 in cash inflows from excess tax benefits related to stock compensation in 2011, 2010 and 2009, respectively. The tax benefit realized from stock options exercised is \$3,139,000, \$621,000 and \$75,000 in 2011, 2010 and 2009, respectively.

Upon share option exercise, new shares are issued as opposed to treasury shares.

In 1999, we entered into a deferred compensation agreement with one of our executive officers. The agreement allowed the employee to elect to defer up to 100% of his compensation on an annual basis. All deferred compensation is invested in the Company's common stock held in a rabbi trust. The stock is held in the name of the trustee, and the principal and earnings of the trust are held separate and apart from other funds of the Company, and are used exclusively for the uses and purposes of the deferred compensation agreement. The accounts of the trust have been consolidated with the accounts of the Company. During 2009, under the terms of the agreement, the stock was released from the trust and issued to the executive.

(12) Financial Instruments with Off-Balance Sheet Risk

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit which involve varying degrees of credit risk in excess of the amount recognized in the consolidated balance sheets. The Bank's exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the borrower.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit-worthiness on a case-by-case basis.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

At December 31, 2011 and 2010, commitments to extend credit and standby and commercial letters of credit were as follows (in thousands):

	December 31	
	2011	2010
Commitments to extend credit	\$1,730,801	\$1,306,871
Standby letters of credit	71,360	54,831

(13) Regulatory Restrictions

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory (and possibly additional discretionary) actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). Management believes, as of December 31, 2011, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

Financial institutions are categorized as well capitalized or adequately capitalized, based on minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the tables below. As shown below, the Company's capital ratios exceed the regulatory definition of well capitalized as of December 31, 2011 and 2010. As of June 30, 2011, the most recent notification from the OCC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. There have been no conditions or events since the notification that management believes have changed the Bank's category. Based upon the information in its most recently filed call report, the Bank continues to meet the capital ratios necessary to be well capitalized under the regulatory framework for prompt corrective action and continues to meet the capital ratios necessary to be well capitalized under the regulatory framework for prompt corrective action.

(In thousands except percentage data)	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2011:						
Total capital (to risk-weighted assets):						
Company	\$774,360	10.56%	\$586,615	8.00%	N/A	N/A
Bank	741,595	10.12%	586,512	8.00%	\$733,140	10.00%
Tier 1 capital (to risk-weighted assets):						
Company	\$701,534	9.57%	\$293,307	4.00%	N/A	N/A
Bank	668,769	9.12%	293,256	4.00%	\$439,884	6.00%
Tier 1 capital (to average assets):						
Company	\$701,534	8.78%	\$319,482	4.00%	N/A	N/A
Bank	668,769	8.37%	319,427	4.00%	\$399,283	5.00%
As of December 31, 2010:						
Total capital (to risk-weighted assets):						
Company	\$697,291	11.83%	\$471,565	8.00%	N/A	N/A
Bank	600,331	10.19%	471,462	8.00%	\$589,327	10.00%
Tier 1 capital (to risk-weighted assets):						
Company	\$623,835	10.58%	\$235,782	4.00%	N/A	N/A
Bank	526,875	8.94%	235,731	4.00%	\$353,596	6.00%
Tier 1 capital (to average assets):						
Company	\$623,835	9.36%	\$266,694	4.00%	N/A	N/A
Bank	526,875	7.90%	266,638	4.00%	\$333,297	5.00%

Dividends that may be paid by subsidiary banks are routinely restricted by various regulatory authorities. The amount that can be paid in any calendar year without prior approval of the Bank's regulatory agencies cannot exceed the lesser of net profits (as defined) for that year plus the net profits for the preceding two calendar years, or retained earnings. No dividends were declared or paid on common stock during 2011, 2010 or 2009.

The required balance at the Federal Reserve at December 31, 2011 and 2010 was approximately \$28,219,000 and \$27,610,000, respectively.

(14) Earnings Per Share

The following table presents the computation of basic and diluted earnings per share (in thousands except share data):

	Year ended December		
	2011	2010	2009
Numerator:			
Net income from continuing operations	\$ 76,102	\$ 37,323	\$ 24,387
Preferred stock dividends	—	—	5,383
Net income from continuing operations available to common shareholders	76,102	37,323	19,004
Loss from discontinued operations	(126)	(136)	(235)
Net income	\$ 75,976	\$ 37,187	\$ 18,769
Denominator:			
Denominator for basic earnings per share-weighted average shares	37,334,743	36,627,329	34,113,285
Effect of employee stock-based awards(1)	682,694	594,707	278,882
Effect of warrants to purchase common stock	315,640	123,992	18,287
Denominator for dilutive earnings per share-adjusted weighted average shares and assumed conversions	38,333,077	37,346,028	34,410,454
Basic earnings per common share from continuing operations	\$ 2.04	\$ 1.02	\$ 0.56
Basic earnings per common share	\$ 2.03	\$ 1.02	\$ 0.55
Diluted earnings per share from continuing operations	\$ 1.99	\$ 1.00	\$ 0.55
Diluted earnings per common share	\$ 1.98	\$ 1.00	\$ 0.55

(1) Stock options, SARs and RSUs outstanding of 98,000, 978,567 and 1,669,686 in 2011, 2010 and 2009, respectively, have not been included in diluted earnings per share because to do so would have been antidilutive for the periods presented. Stock options are antidilutive when the exercise price is higher than the average market price of the Company's common stock.

(15) Fair Value Disclosures

ASC 820, *Fair Value Measurements and Disclosures* ("ASC 820"), defines fair value, establishes a framework for measuring fair value under GAAP and enhances disclosures about fair value measurements. Fair value is defined under ASC 820 as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal market for the asset or liability in an orderly transaction between market participants on the measurement date. The adoption of ASC 820 did not have an impact on our financial statements except for the expanded disclosures noted below.

We determine the fair market values of our financial instruments based on the fair value hierarchy. The standard describes three levels of inputs that may be used to measure fair value as provided below.

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 assets include U.S. Treasuries that are highly liquid and are actively traded in over-the-counter markets.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or

liabilities. Level 2 assets include U.S. government and agency mortgage-backed debt securities, corporate securities, municipal bonds, and Community Reinvestment Act funds. This category includes derivative assets and liabilities where values are based on internal cash flow models supported by market data inputs.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair values requires significant management judgment or estimation. This category also includes impaired loans and OREO where collateral values have been based on third party appraisals; however, due to current economic conditions, comparative sales data typically used in appraisals may be unavailable or more subjective due to lack of market activity. Additionally, this category includes certain mortgage loans that were transferred from loans held for sale to loans held for investment at a lower of cost or fair value.

Assets and liabilities measured at fair value at December 31, 2011 are as follows (in thousands):

	Fair Value Measurements Using		
	Level 1	Level 2	Level 3
Available for sale securities:(1)			
Mortgage-backed securities	\$—	\$ 90,083	\$ —
Corporate securities	—	5,225	—
Municipals	—	30,742	—
Equity securities	—	7,660	—
Other	—	10,000	—
Loans(2)(4)	—	—	12,448
OREO(3)(4)	—	—	34,077
Derivative asset(5)	—	20,071	—
Derivative liability(5)	—	(20,071)	—

- (1) Securities are measured at fair value on a recurring basis, generally monthly.
- (2) Includes impaired loans that have been measured for impairment at the fair value of the loan's collateral.
- (3) OREO is transferred from loans to OREO at fair value less selling costs.
- (4) Fair value of loans and OREO is measured on a nonrecurring basis, generally annually or more often as warranted by market and economic conditions
- (5) Derivative assets and liabilities are measured at fair value on a recurring basis, generally quarterly.

Level 3 Valuations

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. Currently, we measure fair value for certain loans on a nonrecurring basis as described below.

Loans During the three months ended December 31, 2011, certain impaired loans were reevaluated and reported at fair value through a specific valuation allowance allocation of the allowance for possible loan losses based upon the fair value of the underlying collateral. The \$12.4 million total above includes impaired loans at December 31, 2011 with a carrying value of \$12.5 million that were reduced by specific valuation allowance allocations totaling \$11,000 for a total reported fair value of \$12.4 million based on

collateral valuations utilizing Level 3 valuation inputs. Fair values were based on third party appraisals; however, based on the current economic conditions, comparative sales data typically used in the appraisals may be unavailable or more subjective due to the lack of real estate market activity.

OREO Certain foreclosed assets, upon initial recognition, were valued based on third party appraisals. At December 31, 2011, OREO with a carrying value of \$44.8 million was reduced by specific valuation allowance allocations totaling \$10.7 million for a total reported fair value of \$34.1 million based on valuations utilizing Level 3 valuation inputs. Fair values were based on third party appraisals; however, based on the current economic conditions, comparative sales data typically used in the appraisals may be unavailable or more subjective due to the lack of real estate market activity.

Fair Value of Financial Instruments

Generally accepted accounting principles require disclosure of fair value information about financial instruments, whether or not recognized on the balance sheet, for which it is practical to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. This disclosure does not and is not intended to represent the fair value of the Company.

A summary of the carrying amounts and estimated fair values of financial instruments is as follows (in thousands):

	December 31, 2011		December 31, 2010	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Cash and cash equivalents	\$ 101,258	\$ 101,258	\$ 179,866	\$ 179,866
Securities, available-for-sale	143,710	143,710	185,424	185,424
Loans held for sale	2,080,081	2,080,081	1,194,209	1,194,209
Loans held for sale from discontinued operations	393	393	490	490
Loans held for investment, net	5,502,076	5,506,899	4,639,820	4,652,588
Derivative asset	20,071	20,071	6,874	6,874
Deposits	5,556,257	5,557,062	5,455,401	5,457,692
Federal funds purchased	412,249	412,249	283,781	283,781
Borrowings	1,355,867	1,355,869	14,106	14,107
Trust preferred subordinated debentures	113,406	113,406	113,406	113,406
Derivative liability	20,071	20,071	6,874	6,874

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents

The carrying amounts reported in the consolidated balance sheet for cash and cash equivalents approximate their fair value.

Securities

The fair value of investment securities is based on prices obtained from independent pricing services which are based on quoted market prices for the same or similar securities. We have obtained documentation from the primary pricing service we use about their processes and controls over pricing. In addition, on a

quarterly basis we independently verify the prices that we receive from the service provider using two additional independent pricing sources. Any significant differences are investigated and resolved.

Loans, net

For variable-rate loans that reprice frequently with no significant change in credit risk, fair values are generally based on carrying values. The fair value for all other loans is estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. The carrying amount of accrued interest approximates its fair value. The carrying amount of loans held for sale approximates fair value.

Derivatives

The estimated fair value of the interest rate swaps are obtained from independent pricing services. On a quarterly basis, we independently verify the fair value using an additional independent pricing source.

Deposits

The carrying amounts for variable-rate money market accounts approximate their fair value. Fixed-term certificates of deposit fair values are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities.

Federal funds purchased, other borrowings and trust preferred subordinated debentures

The carrying value reported in the consolidated balance sheet for federal funds purchased and other borrowings approximates their fair value. The fair value of other borrowings and trust preferred subordinated debentures is estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar borrowings.

Off-balance sheet instruments

Fair values for our off-balance sheet instruments which consist of lending commitments and standby letters of credit are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. Management believes that the fair value of these off-balance sheet instruments is not significant.

(16) Commitments and Contingencies

We lease various premises under operating leases with various expiration dates. Rent expense incurred under operating leases amounted to approximately \$7,982,000, \$6,916,000 and \$6,968,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

Minimum future lease payments under operating leases are as follows (in thousands):

Year ending December 31,	Minimum Payments
2012	\$ 9,435
2013	8,881
2014	8,625
2015	8,066
2016	7,611
2017 and thereafter	38,578
	\$81,196

(18) Related Party Transactions

See Note 7 for a description of deposits with related parties.

(19) Discontinued Operations

Subsequent to the end of the first quarter of 2007, we and the purchaser of our residential mortgage loan division (“RML”) agreed to terminate and settle the contractual arrangements related to the sale of the division, which had been completed as of the end of the third quarter of 2006. Historical operating results of RML are reflected as discontinued operations in the financial statements.

During 2011, the loss from discontinued operations was \$126,000, net of taxes. The 2011 losses are primarily related to continuing legal and salary expenses incurred in dealing with the remaining loans and requests from investors related to the repurchase of previously sold loans. We still have approximately \$393,000 in loans held for sale from discontinued operations that are carried at the estimated market value at December 31, 2011, which is less than the original cost. We plan to sell these loans, but timing and price to be realized cannot be determined at this time due to market conditions. In addition, we continue to address requests from investors related to repurchasing loans previously sold. While the balances as of December 31, 2011 include a liability for exposure to additional contingencies, including risk of having to repurchase loans previously sold, we recognize that market conditions may result in additional exposure to loss and the extension of time necessary to complete the discontinued mortgage operation.

The results of operations of the discontinued components are presented separately in the accompanying consolidated statements of income for 2011, 2010 and 2009, net of tax, following income from continuing operations. Details are presented in the following tables (in thousands):

	Year ended December 31		
	2011	2010	2009
Revenues	\$ 58	\$ 36	\$ 64
Expenses	250	242	421
Loss before income taxes	(192)	(206)	(357)
Income tax benefit	(66)	(70)	(122)
Loss from discontinued operations	\$(126)	\$(136)	\$(235)

(20) Derivative Financial Instruments

The fair value of derivative positions outstanding is included in other assets and other liabilities in the accompanying consolidated balance sheets.

During 2011 and 2010, we entered into certain interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which we enter into an interest rate swap, cap and/or floor with a customer while at the same time entering into an offsetting interest rate swap, cap and/or floor with another financial institution. In connection with each swap transaction, we agree to pay interest to the customer on a notional amount at a variable interest rate and receive interest from the customer on a similar notional amount at a fixed interest rate. At the same time, we agree to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows our customer to effectively convert a variable rate loan to a fixed rate. Because we act as an intermediary for our customer, changes in the fair value of the underlying derivative contracts substantially offset each other and do not have a material impact on our results of operations.

The notional amounts and estimated fair values of interest rate derivative positions outstanding at December 31, 2011 presented in the following table (in thousands):

	Notional Amount	Estimated Fair Value
Non-hedging interest rate derivative:		
Commercial loan/lease interest rate swaps	\$ 295,914	\$ 20,071
Commercial loan/lease interest rate swaps	(295,914)	(20,071)

The weighted-average receive and pay interest rates for interest rate swaps outstanding at December 31, 2011 were as follows:

	Weighted-Average	
	Interest Rate Received	Interest Rate Paid
Non-hedging interest rate swaps	5.25%	1.90%

Our credit exposure on interest rate swaps is limited to the net favorable value and interest payments of all swaps by each counterparty. In such cases collateral may be required from the counterparties involved if the net value of the swaps exceeds a nominal amount considered to be immaterial. Our credit exposure, net of any collateral pledged, relating to interest rate swaps was approximately \$20.1 million at December 31, 2011, all of which relates to bank customers. Collateral levels are monitored and adjusted on a regular basis for changes in interest rate swap values.

(21) Stockholders' Equity

During 2010, we purchased a portion of a non-controlling interest in a consolidated subsidiary that is controlled and majority owned by the Bank. The purchase resulted in a \$10.2 million reduction in additional paid in capital. Prior to the purchase, we owned 90% of the subsidiary and non-controlling interest on our balance sheet was \$869,000. Subsequent to this purchase we now control 97% of the subsidiary and the non-controlling interest on our balance sheet at December 31, 2011 is \$405,000. Based on an existing agreement with the remaining non-controlling interest, we could purchase the remaining interest in the future based on a multiple of earnings, which could result in a future reduction to additional paid in capital.

On January 27, 2010, we entered into an Equity Distribution Agreement with Morgan Stanley & Co. Incorporated, pursuant to which we may, from time to time, offer and sell shares of our common stock, having aggregate gross sales proceeds of up to \$40,000,000. Sales of the shares are being made by means of brokers' transactions on or through the NASDAQ Global Select Market at market prices prevailing at the time of the sale or as otherwise agreed to by us and Morgan Stanley. As of December 31, 2010 we have sold 734,835 shares at an average price of \$17.58. Net proceeds on the sales are approximately \$12.5 million, are being used for general corporate purposes. During the fourth quarter of 2010, we did not sell any shares under the program.

On May 8, 2009, we completed a sale of 4.6 million shares of our common stock in a public offering. The purchase price was \$13.75 per share, and net proceeds from the sale totaled \$59.4 million. The new capital is being used for general corporate purposes, including capital for support of anticipated growth of our bank.

On January 16, 2009, we completed the issuance of \$75 million of perpetual preferred stock and related warrants under the U.S. Department of Treasury's voluntary Capital Purchase Program ("CPP" or "the Program"). The preferred stock was repurchased in May 2009. In connection with the repurchase, we recorded a \$3.9 million accelerated deemed dividend in the second quarter of 2009 representing the unamortized difference between the book value and the carrying value of the preferred stock repurchased from the Treasury. The \$3.9 million accelerated deemed dividend, combined with the previously scheduled preferred dividend of \$523,000 for the second quarter of 2009 and the preferred dividend of \$930,000 paid in the first quarter of 2009, resulted in a total dividend and reduction of earnings available to common stockholders of \$5.4 million for the year ended December 31, 2009. In the first quarter of 2010, the Treasury auctioned these warrants, and as of December 31, 2010, the warrants to purchase 758,086 shares at \$14.84 per share are still outstanding.

(22) Quarterly Financial Data (unaudited)

The tables below summarize our quarterly financial information for the years December 31, 2011 and 2010 (in thousands except per share and average share data):

- (1) The consolidated statement of operating data and consolidated balance sheet data presented above for the five most recent fiscal years ended December 31 have been derived from our audited consolidated financial statements. The historical results are not necessarily indicative of the results to be expected in any future period.
- (2) Excludes loans held for sale.
- (3) From continuing operations.
- (4) Excludes unrealized gains/losses on securities.

(23) Legal Matters

We are aggressively defending against a \$65.4 million jury verdict that was rendered in August 2011, in Antlers, Oklahoma, a town in rural Pushmataha County. The case was filed by one of the guarantors of a defaulted loan. A judgment has been entered by the trial court. We are pursuing a dismissal of the suit, a change in verdict or a new trial. We will appeal any further adverse judgment that is entered. We have been advised by counsel that there are numerous grounds for dismissal, change in verdict and any appeal.

In addition, we intend to pursue aggressively our suit filed in Texas in April 2010 against the plaintiff in the Oklahoma case and other guarantors of the defaulted loan. The loss related to the loan was recognized in the second quarter of 2010, and we have no remaining balance sheet exposure on the principal balance of the loan. As we currently believe a materially negative outcome in this matter is not probable, we have not established a reserve related to any potential exposure.

(24) New Accounting Standards

ASU No. 2010-20, “Receivables (Topic 310) — Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses” (“ASU 2010-20”) requires entities to provide disclosures designed to facilitate financial statement users’ evaluation of (i) the nature of credit risk inherent in the entity’s portfolio of financing receivables, (ii) how that risk is analyzed and assessed in arriving at the allowance for credit losses and (iii) the changes and reasons for those changes in the allowance for credit losses. Disclosures must be disaggregated by portfolio segment, the level at which an entity develops and documents a systematic method for determining its allowance for credit losses, and class of financing receivable, which is generally a disaggregation of portfolio segment. The required disclosures include, among other things, a rollforward of the allowance for credit losses as well as information about modified, impaired, non-accrual and past due loans and credit quality indicators. ASU 2010-20 became effective for our financial statements as of December 31, 2010, as it relates to disclosures required as of the end of a reporting period. Disclosures that relate to activity during a reporting period became effective for our financial statements on January 1, 2011. Certain disclosures related to troubled debt restructurings were temporarily deferred by ASU 2011-01, “Receivables (Topic 310) — Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20,” and became effective on July 1, 2011 as required by ASU No. 2011-02, “Receivables (Topic 310) — A Creditor’s Determination of Whether a Restructuring Is a Troubled Debt Restructuring.” See Note 3 — Loans.

ASU No. 2010-28, “Intangibles — Goodwill and Other (Topic 350) — When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts” (“ASU 2010-28”) modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist such as if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. ASU 201-28 became effective for us on January 1, 2011 and did not have a significant impact on our financial statements.

ASU No. 2011-02, “Receivables (Topic 310) — A Creditor’s Determination of Whether a Restructuring Is a Troubled Debt Restructuring,” (“ASU 2011-02”) clarifies which loan modifications constitute troubled debt restructurings and is intended to assist creditors in determining whether a modification of the terms of a receivable meets the criteria to be considered a troubled debt restructuring, both for purposes of recording an impairment loss and for disclosure of troubled debt restructurings. In evaluating whether a restructuring constitutes a troubled debt restructuring, a creditor must separately conclude, under the guidance clarified by ASU 2011-02, that both of the following exist: (a) the restructuring constitutes a concession and (b) the debtor is experiencing financial difficulties. ASU 2011-02 became effective for us on July 1, 2011, and applies retrospectively to restructurings occurring on or after January 1, 2011. See Note 3 — Loans.

ASU 2011-04, “Fair Value Measurement (Topic 820) — Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs” (“ASU 2011-04”) amends Topic 820, “Fair Value Measurements and Disclosures,” to converge the fair value measurement guidance in U.S. generally accepted accounting principles and International Financial Reporting Standards (“IFRS”). ASU 2011-04 clarifies the application of existing fair value measurement requirements, changes certain principles in Topic 820 and requires additional fair value disclosures. ASU 2011-04 is effective for annual periods beginning after December 15, 2011, and is not expected to have a significant impact on our financial statements.

ASU 2011-05, “Comprehensive Income (Topic 220) — Presentation of Comprehensive Income” (“ASU 2011-05”) amends Topic 220, “Comprehensive Income,” to require that all non-owner changes in stockholders’ equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. Additionally, ASU 2011-05 requires entities to present, on the face of the financial statements, reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement or statements where the components of net income and the

components of other comprehensive income are presented. The option to present components of other comprehensive income as part of the statement of changes in stockholders' equity was eliminated. ASU 2011-05 is effective for annual and interim periods beginning after December 15, 2011; however certain provisions related to the presentation of reclassification adjustments have been deferred by ASU 2011-12 "Comprehensive Income (Topic 820)—Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05." ASU 2011-05 is not expected to have a significant impact on our financial statements.

ASU 2011-08, "Intangibles — Goodwill and Other (Topic 350) — Testing Goodwill for Impairment" ("ASU 2011-08") amends Topic 350, "Intangibles — Goodwill and Other," to give entities the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. ASU 2011-08 is effective of annual and interim impairment tests beginning after December 15, 2011, and is not expected to have a significant impact on our financial statements.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

We have established and maintain disclosure controls and other procedures that are designed to ensure that material information relating to us and our subsidiaries required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. For the period covered in this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2011.

The Chief Executive Officer and Chief Financial Officer have also concluded that there were no changes in our internal control over financial reporting identified in connection with the evaluation described in the preceding paragraph that occurred during the fiscal quarter ended December 31, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is a process designed under the supervision of our Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with generally accepted accounting principles.

As of December 31, 2011, management assessed the effectiveness of the Company's internal control over financial reporting based on the criteria for effective internal control over financial reporting established in "Internal Control — Integrated Framework," issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based on the assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2011, based on those criteria.

Ernst & Young LLP, the independent registered public accounting firm that audited the consolidated financial statements of the Company included in this Annual Report on Form 10-K, has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. The report, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011, is included in this Item under the heading "Report of Independent Registered Public Accounting Firm."

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Texas Capital Bancshares, Inc.

We have audited Texas Capital Bancshares, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Texas Capital Bancshares Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Texas Capital Bancshares Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Texas Capital Bancshares, Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011 and our report dated February 23, 2012 expressed an unqualified opinion thereon.
